Performance Review
March 2024

ECONOMIC ENVIRONMENT

Count the Price Increases, Not Your Chickens

In the first quarter of 2024, the global financial landscape exhibited a mix of cautious optimism and emerging challenges. Despite initial hopes for significant interest rate cuts, spurred by declining inflation expectations, actual inflation rates did not decrease as anticipated. This has tempered expectations for imminent rate cuts and raised concerns about potential inflationary pressures, which could lead central banks to reconsider their easing strategies.

Global GDP growth remained robust, driven by strong consumer spending and liquidity. Advanced estimates of Q1 2024 GDP from the Bureau of Economic Analysis increased 1.6%, signaling ongoing economic resilience.

Despite steady employment and income levels, signs of financial stress appeared in certain population segments. Notably, there was a reduction in excess savings and a leveling off of wage gains, coupled with low savings rates and diminished pent-up demand. The resumption of student loan payments and rising delinquencies in subprime auto loans and millennial credit card debts hinted at potential vulnerabilities. Nevertheless, consumer spending growth

was expected to remain positive, though at a more subdued pace compared to the previous year.

U.S. households maintained relatively healthy balance sheets and debt servicing levels, buoyed by a tight labor market. This foundation supported continued consumer spending, crucial for sustaining economic momentum.

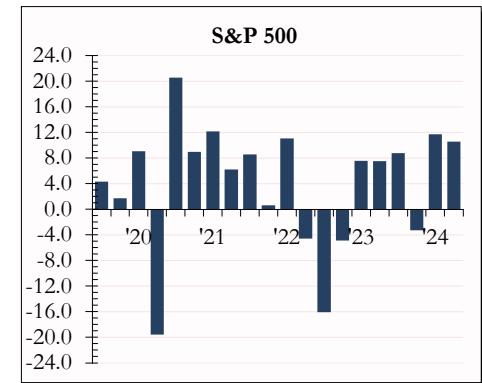

On the business front, U.S. companies largely managed to sustain profit margins, despite significant sectoral variations. The business investment outlook was cautious, influenced by higher interest rates that increased capital costs and dampened borrowing. Businesses faced a complex environment, needing to adapt to financial pressures while also responding to shifting consumer demands and global market dynamics.

Looking ahead, the investment climate calls for a nuanced approach, balancing optimism with a realistic assessment of potential economic slowdowns and inflationary pressures.

DOMESTIC EQUITIES

Higher We Go

In the first quarter of 2024, the U.S. stock market sustained its upward trajectory, with the Russell 3000 Index advancing by 10.0%, a testament to the market's resilience and optimism.

The period was characterized by large-cap stocks continuing to assert their dominance, with the Russell 1000 Index climbing 10.3%, outperforming their smaller counterparts, as the Russell 2000 Index saw a more modest rise of 5.2%. This divergence highlights a continued investor preference for the seeming safety and stability offered by large-cap entities.

The Real Estate sector was the worst performing sector trailing due to persistent inflation worries, dampening hopes for imminent interest rate cuts. In stark contrast, Communication Services and Information Technology sectors flourished, driven largely by the performance of the largest U.S. companies which have thrived in the prevailing economic climate. The top 50 stocks, as measured by the S&P 500 Top 50 Index, outperformed, registering a 12.1% return.

Energy also enjoyed a buoyant quarter, fueled by a revival in oil prices, as evidenced by the 15.7% uptick in the S&P GSCI Energy Commodity index.

The market's risk-on mentality was further illustrated in the performance of momentum stocks, which soared by 22.6%, signaling a robust appetite for risk amid the rally. Yet, in a divergent trend, low volatility stocks lagged, posting a gain of merely 5.8%.

Valuation metrics continued their upward trajectory across the board, with large-cap stocks commanding a premium at 21.0x forward earnings, compared to mid-cap and small-cap stocks, valued at 16.3x and 15.3x forward earnings, respectively. This

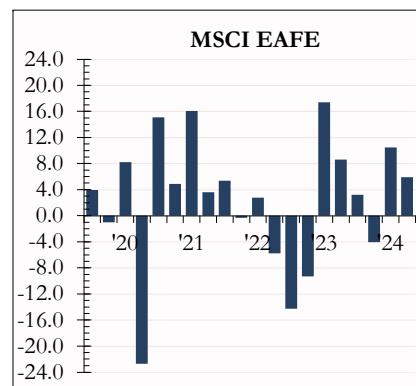

pricing pattern echoes a market disposition favoring the perceived security of large-cap investments, even as valuations stretch above long-term historical averages, reflecting a broader market rally underpinned by a blend of caution and confidence.

INTERNATIONAL EQUITIES

Joining the Party

International equities saw growth, with the MSCI All Country World ex-US Index rising by 4.8%, continuing its impressive trajectory from the previous year. The index's one-year return is now 13.8%.

This growth was echoed in the MSCI EAFE Index, which represents international developed markets, witnessing a rise of 5.9%. All regions recorded positive growth. The local currency

variant of the EAFE Index particularly excelled, surging by 10.1% as the U.S. dollar strengthened against a broad basket of foreign currencies.

Japan, the largest country by weighting within the index, led the way with a remarkable

11.2% growth for the quarter. The U.K., despite being the worst performing country, still managed modest growth of 3.1%.

In emerging markets, the MSCI Emerging Markets Index saw a modest increase of 2.4%. The performance within the Far East markets was mixed, with Taiwan standing out through a robust

12.5% return for the quarter. Conversely, China, the largest constituent of the index, experienced a 2.2% decline, bogged down by its real estate sector issues, escalating tensions concerning Taiwan, and regulatory uncertainties.

Nonetheless, the Chinese government has intensified efforts to attract global investors back to the market.

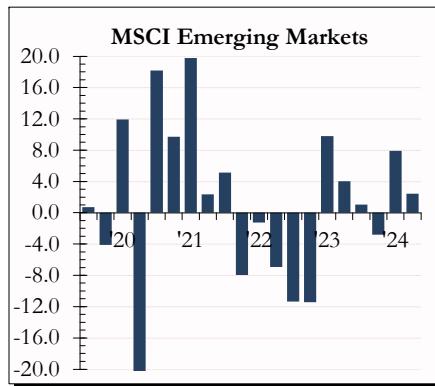

While international markets generally lag behind the U.S., the combination of existing valuation discounts, currency undervaluation, and optimistic growth outlooks positions them favorably for potential outperformance in the future. However, these tailwinds continue to be overshadowed by geopolitical tensions.

BOND MARKET

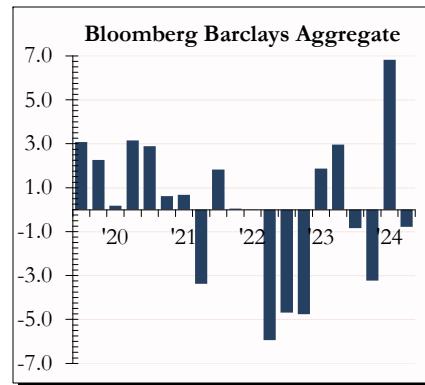

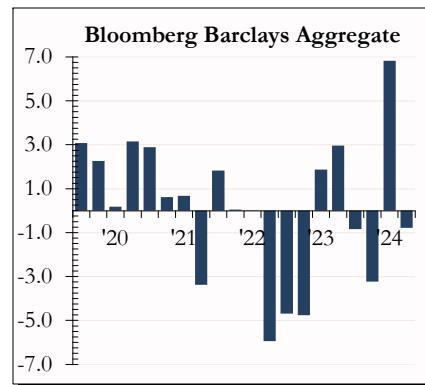

Party Invitation Missing

In the first quarter of 2024, the fixed income suffered as rate cut expectations dissipated. The Bloomberg U.S. Aggregate Bond Index fell slightly, losing -0.8. This negative trend continued across all strategies that had any duration or quality-bias. The indices that did well included U.S. Floating Rate Notes, and Corporate High Yield.

Internationally, the Bloomberg Global Aggregate Index underperformed its U.S. counterpart, posting a -2.0% loss.

Notably, its local dollar equivalent did much better, maintaining an essentially flat, but positive quarter. This dynamic was caused by the appreciation of most global currencies in relation to the U.S. dollar.

Fixed income markets will continue to oscillate as varying factors affect their path. Geopolitical issues are pushing investors towards these markets as they search for safety, while inflation expectations increasing has caused investors to flee as they fear being caught with too much duration.

These markets are expected to eke out positive returns for the year, as markets still expect a small number of interest rate cuts before the close of 2024.

CASH EQUIVALENTS

No Guessing Here

The three-month T-Bill returned 1.3% for the first quarter. Three-month treasury bills are now yielding 5.4%. The projected path of rates has a broad dispersion and is being widely debated.

PERFORMANCE REVIEW
MARCH 2024

INVESTMENT RETURN

On March 31st, 2024, the City of Alexandria Defined Benefit Plan's Polen Capital Management Polen Focus Growth Strategy portfolio was valued at \$45,880,204, representing an increase of \$345,829 from the December quarter's ending value of \$45,534,375. Last quarter, the Fund posted withdrawals totaling \$3,454,573, which offset the portfolio's net investment return of \$3,800,402. Income receipts totaling \$55,139 plus net realized and unrealized capital gains of \$3,745,263 combined to produce the portfolio's net investment return.

RELATIVE PERFORMANCE

For the first quarter, the Polen Capital Management Polen Focus Growth Strategy portfolio returned 8.2%, which was 3.2% below the Russell 1000 Growth Index's return of 11.4% and ranked in the 90th percentile of the Large Cap Growth universe. Over the trailing year, the portfolio returned 32.2%, which was 6.8% below the benchmark's 39.0% return, ranking in the 74th percentile. Since June 2011, the portfolio returned 15.2% annualized. The remaining sectors were left unfunded.

Last quarter, the portfolio underperformed the Russell 1000 Growth Index in five of the six invested sectors. The underweight Information Technology sector, which held the highest concentration, returned a considerable margin below the benchmark. Additionally, Industrials returned losses against the benchmark's gains while vacancies in Consumer Staples, Materials, and Utilities were missed opportunities. Despite a tailwind in Consumer Discretionary, the portfolio finished 320 basis points below the index counterpart.
