ECONOMIC ENVIRONMENT

Mind the Gap (in Supply-Demand)

Global equities rose 7.5% in the second quarter as many of the world's largest economies reopened and government stimulus measures fueled investor optimism.

Valuations are elevated, which may present a challenge to markets

in the months ahead. Earnings have again been revised upward to +36% for 2021, with a double-digit gain expected for 2022. However, many believe current prices already reflect anticipated earnings improvement.

Government stimulus and healthy consumer balance sheets are creating a rebound in economic growth. Advance estimates of Q2 2021 GDP from the U.S. Bureau of Economic Analysis increased at an annual rate of 6.5%. However, supply chain issues resulting from increased demand and prolonged stoppages due to COVID are still slowing the worldwide supply response, resulting in a rapid acceleration of inflation that is expected to be temporary.

The Federal Reserve's employment mandate seems to be the driving force behind its policy decisions. We may have to see a prolonged decrease in unemployment before that policy changes.

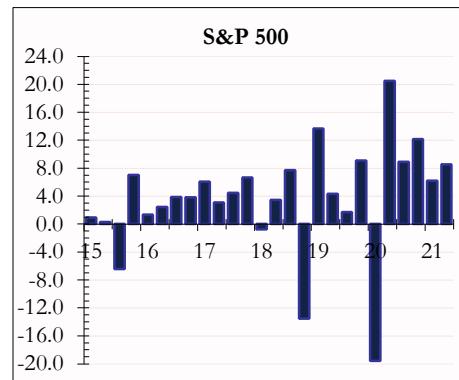

The Fed has indicated that it is willing to tolerate an inflation overshoot to accomplish full employment.

While companies posted the highest rate of job openings in decades, unemployment remains elevated as the number of job seekers increases in response to the expiration of unemployment benefits. In theory this dynamic should push the unemployment rate higher than it otherwise would be. However, due to changes in work dynamics (work-from-home, gig-economy, early-retirements, etc.), more than 3.5 million people have left the work force. If these people do not return, it may imply that the supply-demand gap in employment will persist for longer than expected.

Global economies seem to be moving in a positive direction. How quickly the gaps between supply and demand are filled is the question keeping markets in a holding pattern for now.

DOMESTIC EQUITIES

Reversal of the Reversal

U.S. equities, as measured by the S&P 500, gained 8.5% over the second quarter. This brings the year-to-date return to 15.3%. Almost all industry sectors in the S&P 500 had

positive returns. The lone exception was the utilities sector, which lost 0.4%.

Trends that dominated throughout the last decade reversed in the fourth quarter last year, but that reversal ended in the second quarter of 2021. Both large capitalization and growth equities regained leadership. The Russell 1000 index, a proxy for large capitalization stocks, returned 8.5% in the second quarter while the Russell 2000, a small capitalization benchmark, returned only 4.3%. The Russell 3000 Growth Index gained 11.4% while its value counterpart returned 5.2%.

Energy was the best performing sector due to sustained price increases. West Texas Intermediate (WTI) crude oil, one of the main benchmarks used in the industry, moved from \$31 from the end of September 2020 to \$70 at the end of June 2021. This new price also starkly contrasts with last year when the May contract for WTI futures fell below zero for the first time. Many observers believe WTI needs to be priced above \$50 for the majority of our drilling in the United States to be profitable.

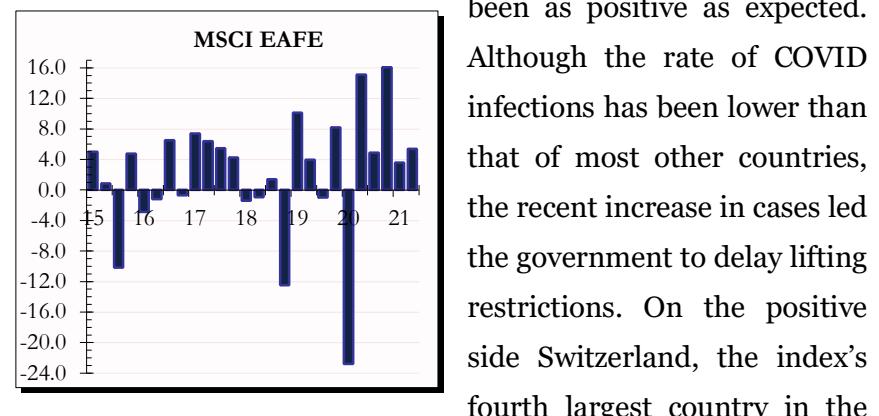

INTERNATIONAL EQUITIES

Rising Broadly

International markets advanced broadly in the second quarter of 2021. The MSCI ACWI ex USA Index was up 5.6%.

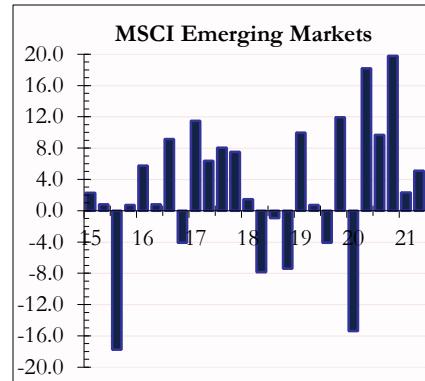

In developed markets, the MSCI EAFE gained 5.4%. Of the 21 constituent countries in the index, 17 had positive returns.

However, Japan, the largest country in the index by market capitalization, sustained a loss. Economic data from Japan has not been as positive as expected.

index by market capitalization, gained 10.5%. Nestle, the largest individual company by market capitalization in the index, returned 12.2% for the quarter.

Emerging markets gained 5.1% despite a May sell-off due to renewed concerns over the tightening of global monetary policy. Brazil, the index's fifth largest country by market capitalization,

gained 21.4%. Strength in the real, Brazil's currency, amplified returns. China, the largest country in the index by weight, was an overall drag to performance. Chinese equities gained only 1.5%, as regulatory concerns broadened beyond

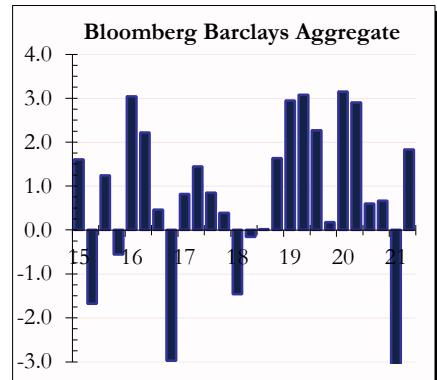

the technology sector. Valuation multiples for the emerging market

index are significantly lower than their developed market peers. This could potentially be a boon should earnings growth remain elevated.

BOND MARKET

Tightening Up Further

Fixed income markets were positive for the quarter, paring losses

from earlier in the year. Credit spreads tightened to levels last seen in 2005, as consumer sentiment recovered and the Fed reiterated its commitment to not let inflation get out of control. While actual inflation increased during the quarter,

anticipated inflation as measured by the 10-year breakeven rate fell to 2.3%. This helped the Bloomberg Barclays Aggregate Index rise 1.8% for the quarter.

Interest rate sensitivity continues to drive returns. Long-dated Treasuries during the quarter, up 6.8%. High yield bonds also did well. The Bloomberg Barclays High Yield Index was up 2.8%. The rise in oil prices helped energy companies, and energy bonds comprise 13% of the index.

Most Treasury yields fell during the quarter. The 10-year Treasury yield fell 0.3% and is now at 1.4%. However, at the front end of the

curve, the two-year Treasury yield rose slightly to 0.25% after the Fed updated its dot plot to indicate a rise in rates may come in 2023 instead of 2022.

The US Dollar continued to weaken against most foreign currencies, causing hedged strategies to again lag unhedged strategies. The World Government Bond Index (unhedged) returned 1.0%, while its hedged counterpart returned 0.7%.

Emerging market bonds, as measured by the J.P. Morgan Emerging Markets Bond Index rose 4.4% for the quarter. However, spreads are still above historical averages, indicating near-term uncertainty in emerging market economic recovery.

CASH EQUIVALENTS

For Liquidity Only

The three-month T-Bill returned -0.01% for the second quarter. This is the 54th quarter in a row that return has been less than 75 basis points and the first where the return was negative. The last time return was greater than 80 basis points was in the fourth quarter of 2007. Return expectations continue to be low. Cash equivalents are unlikely to provide positive real returns in the foreseeable future.
