## ECONOMIC ENVIRONMENT

### Sentiment Swings

While much of the third quarter had an optimistic tone, September experienced a sentiment shift. Concerns on supply chains, inflation, and peak accommodative policy led investors to sell, erasing much of the quarter's initial gains. The MSCI World Index ended the third quarter up 0.1%.

Advance estimates of Q3 2021 GDP from the U.S. Bureau of Economic Analysis increased at an annual rate of 2.0% in the third quarter, decelerating from an increase of 6.7% in the second quarter. Much of

the growth outlook is now expected in the first half of 2022, when the current supply-demand imbalance in global markets is expected to improve.

The US Federal Reserve announced that it will soon begin to slow the pace of asset purchases, setting them to end by the middle of next year. Additionally, the Federal Reserve's fed funds rate projections show a faster rate hiking schedule than was previously expected. The median rate expectation for 2023 moved up to three hikes from two with three additional hikes in 2024. Federal Reserve governors were evenly split (9-9) on a rate hike in 2022.

Inflation concerns continued to roil markets due to evidence that it will not be as transitory as originally expected. Inflation for the full year 2021 rose to 4.2% from its previous estimate of 3.4%.

Global central banks continue to walk the tightrope between pulling back on the accommodations initiated during the pandemic and continuing to implement policies to support their mandate of full employment.

## DOMESTIC EQUITIES

### Trudging Along

U.S. equities, as measured by the S&P 500, gained 0.6% over the third quarter. After beginning the quarter with two strong months, the index gave up most of its gains in September. This brings the year-to-date return to 15.9%.

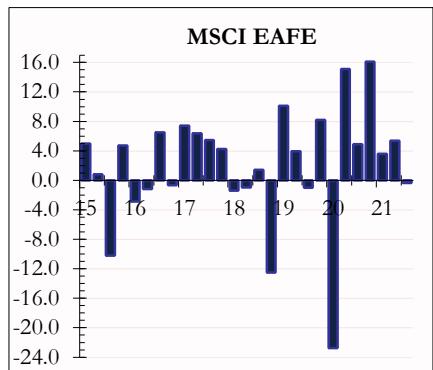

For much of the quarter, the tech sector performed best, but as bond yields rose in late September, financial stocks rallied on the prospect of higher interest rates and overtook tech as the leading sector in the quarter with a 2.7% return. Healthcare also performed well, bolstered by pharmaceutical stocks, which rose on COVID-19 vaccine mandates and booster shot approvals.

The industrials and materials sectors were the poorest performers, falling -4.2% and -3.5% respectively. Uncertainty surrounding the strength of the economic recovery due to a rise in COVID-19 cases pressured these sectors, as did an impasse in Congress over the \$1 trillion bipartisan infrastructure bill. Chinese economic growth concerns following the Evergrande debt drama were also a factor.

Both large capitalization and growth equities beat their counterparts, as was the case in the second quarter. Growth's strong returns were largely thanks to tech sector gains, although the amount of outperformance declined considerably during the final week of the quarter as tech shares fell. The Russell 1000 index, a proxy for large capitalization stocks, returned 0.2% in the third quarter while the Russell 2000, a small capitalization benchmark, returned -4.4%. The Russell 3000 Growth Index gained 0.7% while its value counterpart returned -0.9%.

## INTERNATIONAL EQUITIES

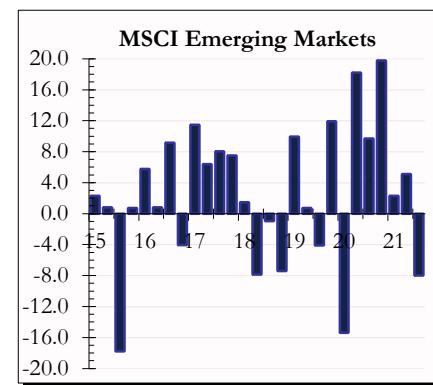

### Give Back

International markets broadly declined in US dollar terms. The MSCI All Country World ex. US index lost -2.9%. In developed markets, the MSCI EAFE lost -0.4%. Of the 21 constituent countries in the

index, 13 had negative returns. However, the largest country in the index by market capitalization, Japan, gained 3.8%. It was the only country in the top 5 by weighting to see gains. Throughout the pandemic, Japan has consistently showed a lower infection rate than most developed nations. Moreover, order trends, capital expenditure plans, and corporate results have been strong. An announcement by Toyota Motor that there would be production cuts late in the quarter due to the global shortage of semiconductors kept sentiment from rising sharply. Hong Kong equities suffered the most in the third quarter, losing -10.1%. Overall sentiment weakened due to the recent round of policy tightening on the technology and education sectors.

Emerging markets lost -8.1% in the third quarter. This loss was led

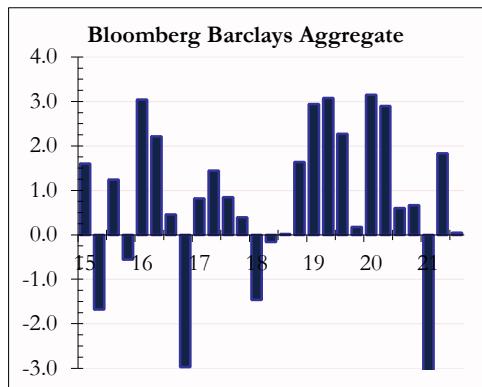

by Chinese and Brazilian equities, which lost -18.6% and -22.4%, respectively. These two countries account for nearly 38% of the index. Chinese equities were affected by the same increased regulatory action that Hong Kong equities were. Brazilian equities were hurt by above-target inflation (year-over-year increase of 8.4%). The Brazilian central bank has responded to this inflation spike with further interest rate hikes.

Bright spots were seen in net-energy exporter economies: Colombia, Russia, Kuwait, Saudi Arabia, Qatar, and the United Arab Emirates. Equities from these countries returned between six and ten percent.

## BOND MARKET

### Flat Overall

Fixed income markets were slightly positive for the quarter, with the Bloomberg Barclays Aggregate Index rising by 0.05%. Credit

spreads had their first quarter of spread widening since early 2020, due to Delta variant uncertainty and massive new issuances. There were some opportunities for investment as virus fears

waned and seasonal liquidity factors reversed later in the quarter, but overall, this small move did little to change the narrow-spread environment.

U.S. headline inflation increased 0.9% month-over-month in the July report — this was the largest monthly increase since 2008. However, it rose at a more modest pace (0.5% and 0.3%) in the following two months.

A multi-month Treasury rally, brought on by fears of slowing economic growth, brought the 10-year Treasury yield to its lowest

level since early 2021. However, Treasuries gave up those gains following the Federal Reserve's signal that the beginning of the taper is imminent. Investors bought into the central bank's confidence in economic recovery, moving Treasury yields slightly higher heading into the fourth quarter of 2021. Tapering is expected to last into the first half of 2022.

The US Dollar strengthened against most foreign currencies. The World Government Bond Index (hedged) fell 0.01%, while the unhedged version fell -1.2%

The Bloomberg Barclays High Yield Index was up 0.9%. High-yield corporate issuers continued to flood the market as they rushed to capitalize on the low cost of borrowing before rates increase further.

Emerging market bonds, as measured by the J.P. Morgan Emerging Markets Bond Index, fell -1.02% for the quarter.

## CASH EQUIVALENTS

### Real Return is Negative

The three-month T-Bill returned -0.03% for the third quarter. This is the 55th quarter in a row that return has been less than 75 basis points and the second where the return was negative. The year-to-date return is now negative (-0.03%). Return expectations continue to be low. Cash equivalents are unlikely to provide positive real returns in the foreseeable future.

When compared to the Russell 1000 Growth Index, the portfolio was overweight in the Communication Services, and Health Care sectors. The Consumer Discretionary, Financials and Information Technology sectors were underweight, and the remaining sectors were left unfunded.

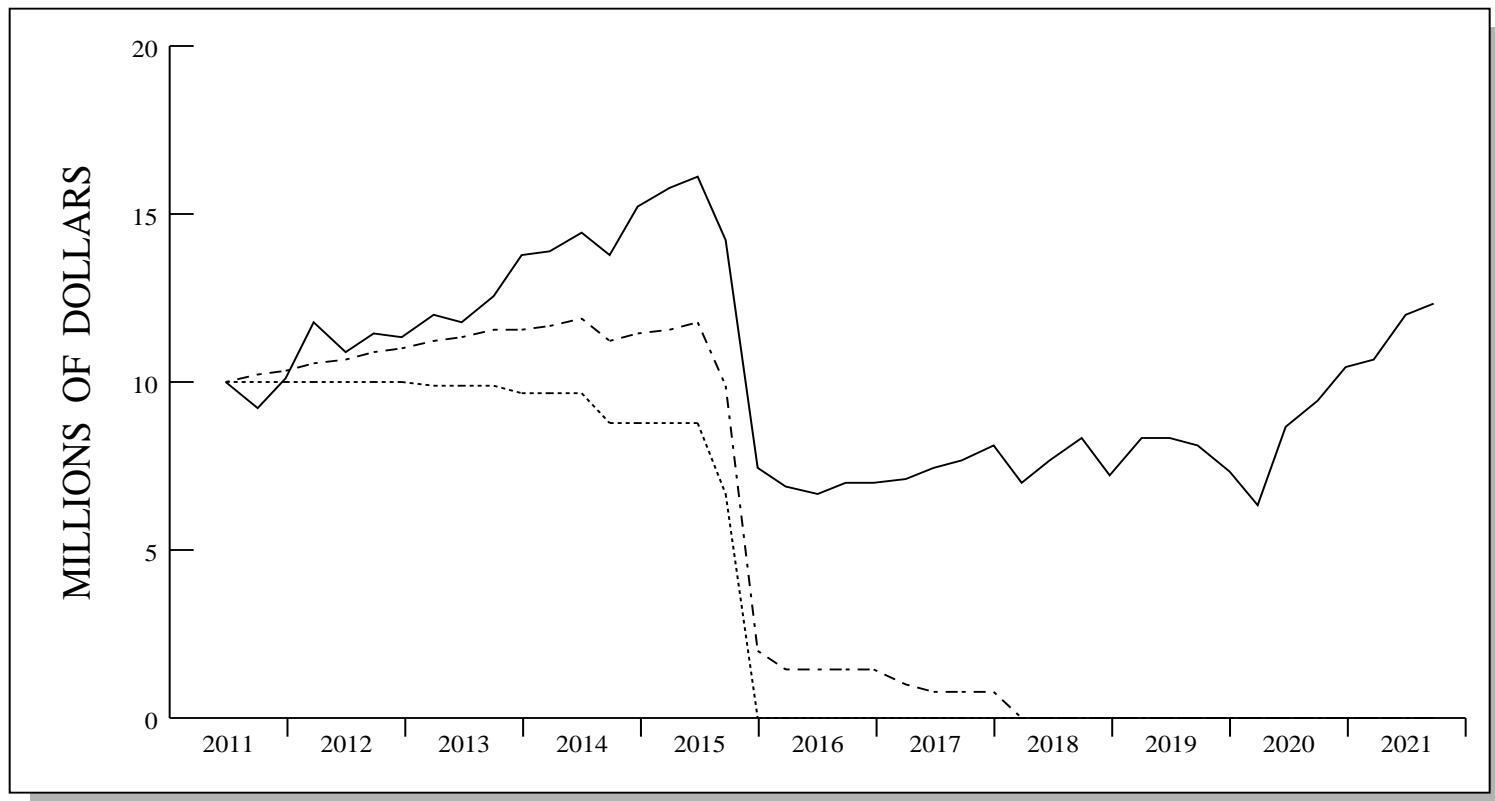

The portfolios outperformance last quarter can be attributed to stellar stock selection in the overweight Communication Services. There were also bright spots seen in the Financials and Information Technology sectors which helped to add further value to the portfolio. The decision to underweight the Consumer Discretionary sector proved beneficial due to its negative return versus the benchmarks positive return. Overall, the portfolio outpaced the index by 160 basis points.
