ECONOMIC ENVIRONMENT

Continued Pressure

In Q2 2022, the only consistent attribute of the economy was

uncertainty. The second estimate of second quarter GDP from the U.S. Bureau of Economic Analysis decreased at an annualized rate of 0.6%, marking the official start of a recession in the United States.

Despite this grim overhang, many non-survey economic indicators have remained strong. Other indicators which had previously shown unsatisfactory figures, have started to see improvement.

Unemployment has remained steady at 3.6%, with job growth across industries including those most sensitive to changes in the business cycle: restaurants and temporary workers. While we have seen some layoffs at previously high-flying technology firms, this lack of upward movement to the headline figure implies that overall, companies are still hiring, albeit at a slower rate.

Household debt service payments as a percent of disposable personal income have moved up to 9.5%. This is up from their multi-decade low of 8.4% in Q1 2021. However, households are still in a better position than they were pre-COVID (9.9%) and

compared to where they were before the last two recessions. In 2001 and 2008, households were spending more than 12% of their disposable income on servicing their debt.

Despite these relatively positive notes on the consumer, inflation is still the overriding concern. The Beige Book, a summary of current economic conditions released by the Federal Reserve, notes “substantial price increases were reported across all [Federal Reserve] districts, at all stages of consumption...though there are several reports that price inflation for these categories has slowed.” So long as inflation remains high, uncertainty will rule the day.

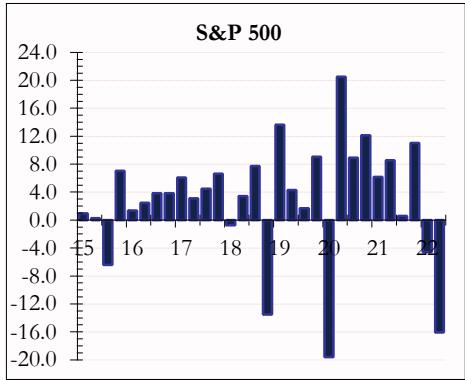

The Federal Reserve is acutely aware of this. Statements from board members have tended to be hawkish, with many making mention of Arthur Burns, the Federal Reserve Chairman who is broadly remembered for being unable to keep inflation in check back in the 70's. This is a legacy that they are all trying to avoid and tends to lead to the assumption that the Federal Reserve will be more aggressive in hiking rates so long as the headline inflation figure remains elevated.

The prevailing view is that inflation figures have reached an apex and will slowly come down for the remainder of the year. Though commodities are already more than 15% off their highs, it will take time for this lower input pricing to work its way to consumer prices.

DOMESTIC EQUITIES

Uncertainty Persists

U.S. equities, as measured by the Russell 3000, lost 16.7% in the second quarter. Using the S&P 500 as a proxy, large capitalization companies lost 16.1%. These losses were sustained broadly, with all eleven market sectors posting negative returns.

Consumer Discretionary was the worst performing sector, down 26.2% for the quarter as recession fears overtook investors. Consumer Staples was the best performing sector, down only 4.6% as investors preferred to own businesses believed best to weather a potential downturn. Even Energy stocks, last quarter's standout sector gave up back some of the year's gains and finished the quarter down 5.2%, as sustained high prices are starting to hurt demand.

The trend of outperformance in the Value style, relative to Growth, continued in the second quarter across all market capitalizations. The relative outperformance was between 4% and 11%.

Capitalization did not matter much in the second quarter with large, mid, and small companies all suffering similar losses. Using Russell indices as a proxy: small-capitalization stocks lost 17.2%,

mid-capitalization stocks lost 16.9%, and large-capitalization stocks lost 16.7%.

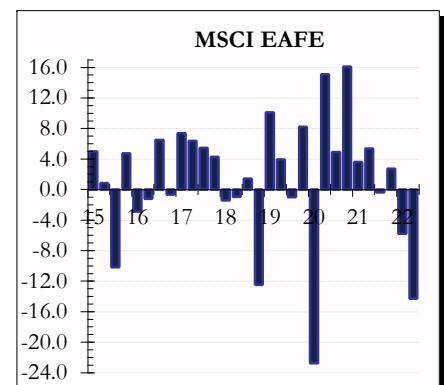

Quality and dividends continue to be the preferred factors, once again outperforming the broad market. The S&P 500 Low Volatility Index only lost 6.9% and the Dow Jones U.S. Select Dividend Index lost 7.4% in the second quarter, representing outperformance of nearly 10% vs. the broader large-cap index.

INTERNATIONAL EQUITIES

War Impacts

International markets fell again in the second quarter. The MSCI All Country World ex. US index, which broadly tracks the global market excluding the United States, lost 13.7%. Value outperformed its growth counterpart, but both saw sharp falls.

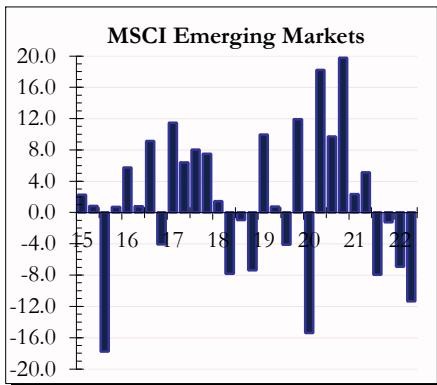

In developed markets, the MSCI EAFE lost 14.5%. All 21 of the constituent countries in the index had negative returns. European stocks were hurt by the continuing war in Ukraine and concerns over potential gas shortages. Germany was among

the biggest decliners, falling over 20%. It has moved to phase two of its emergency energy plan. The next step would involve rationing gas to industrial users, and potentially households as

well. Japan was down 14.8% on monetary policy and currency concerns. The yen weakened against the US Dollar, falling to a level that hadn't been seen in twenty years.

Emerging markets lost 11.5% in the quarter. The Latin American

markets of Colombia, Peru and Brazil were among the weakest markets in the index, with each falling at least 27%. A combination of rising concern over a global recession, domestic policy uncertainty, and lower metals

prices, contributed to declines. China was the only emerging market to generate a positive return over the quarter, rising 2.3%. Lockdown measures in some cities have been eased and additional economic support measures have been announced.

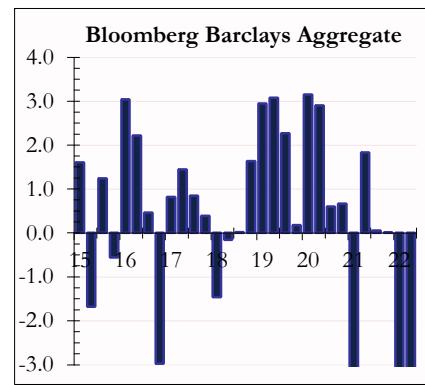

BOND MARKET

Worst Quarterly Return

Fixed income markets continued to drop in the second quarter as interest rates continued to rise. The sentiment of 'nowhere to hide' rings true even in the bond market. The Federal Reserve continued to hike interest rates further and will continue doing so until they are satisfied with inflation numbers. Regardless of the

sector or credit spectrum, bond returns were negative across the board.

The Bloomberg U.S. Aggregate Index, an index that tracks the

broad investable US fixed income market, lost 4.7%. This continues the historically poor performance of the asset class, and now brings down the year-to-date return below -10%.

Global bonds, using the Bloomberg Global Aggregate

as a proxy, performed worse than their U.S. counterparts, losing 8.3%.

Shorter term bonds performed better than their longer-term counterparts once again. The 1-3 Gov Credit only lost 0.6%, while Long Gov/Credit lost 12.3%.

CASH EQUIVALENTS

Low and Lower

The three-month T-Bill returned -0.13% for the second quarter. This is the 58th quarter in a row that return has been less than 75 basis points and the fifth where the return was negative.

Nominal return expectations for cash have moved up relative to the last few years. 3-month treasury notes are now yielding 2.0%.

BRANDYWINE GLOBAL INVESTMENT MANAGEMENT - DYNAMIC LARGE CAP VALUE
PERFORMANCE REVIEW
JUNE 2022

INVESTMENT RETURN

On June 30th, 2022, the City of Alexandria Supplemental Retirement Plan's Brandywine Global Investment Management Dynamic Large Cap Value portfolio was valued at \$17,917,162, a decrease of \$2,493,217 from the March ending value of \$20,410,379. Last quarter, the account recorded total net withdrawals of \$21,312 in addition to \$2,471,905 in net investment losses. The fund's net investment loss was a result of income receipts totaling \$97,761 and realized and unrealized capital losses totaling \$2,569,666.

RELATIVE PERFORMANCE

During the second quarter, the Brandywine Global Investment Management Dynamic Large Cap Value portfolio lost 12.1%, which was 0.1% greater than the Russell 1000 Value Index's return of -12.2% and ranked in the 56th percentile of the Large Cap Value universe. Over the trailing year, the portfolio returned -8.5%, which was 1.7% less than the benchmark's -6.8% performance, and ranked in the 73rd percentile. Since September 2016, the account returned 11.4% per annum and ranked in the 11th percentile. For comparison, the Russell 1000 Value returned an annualized 8.2% over the same time frame.

ANALYSIS

The Brandywine portfolio utilized ten of the eleven industry sectors in our analysis last quarter. Relative to the Russell 1000 Value Index, the portfolio was overweight in the Consumer Discretionary, Financials, Health Care, and Materials sectors. The Communication Services, Consumer Staples, Energy, Industrials, and Information Technology were underweight, while Real Estate remained vacant.

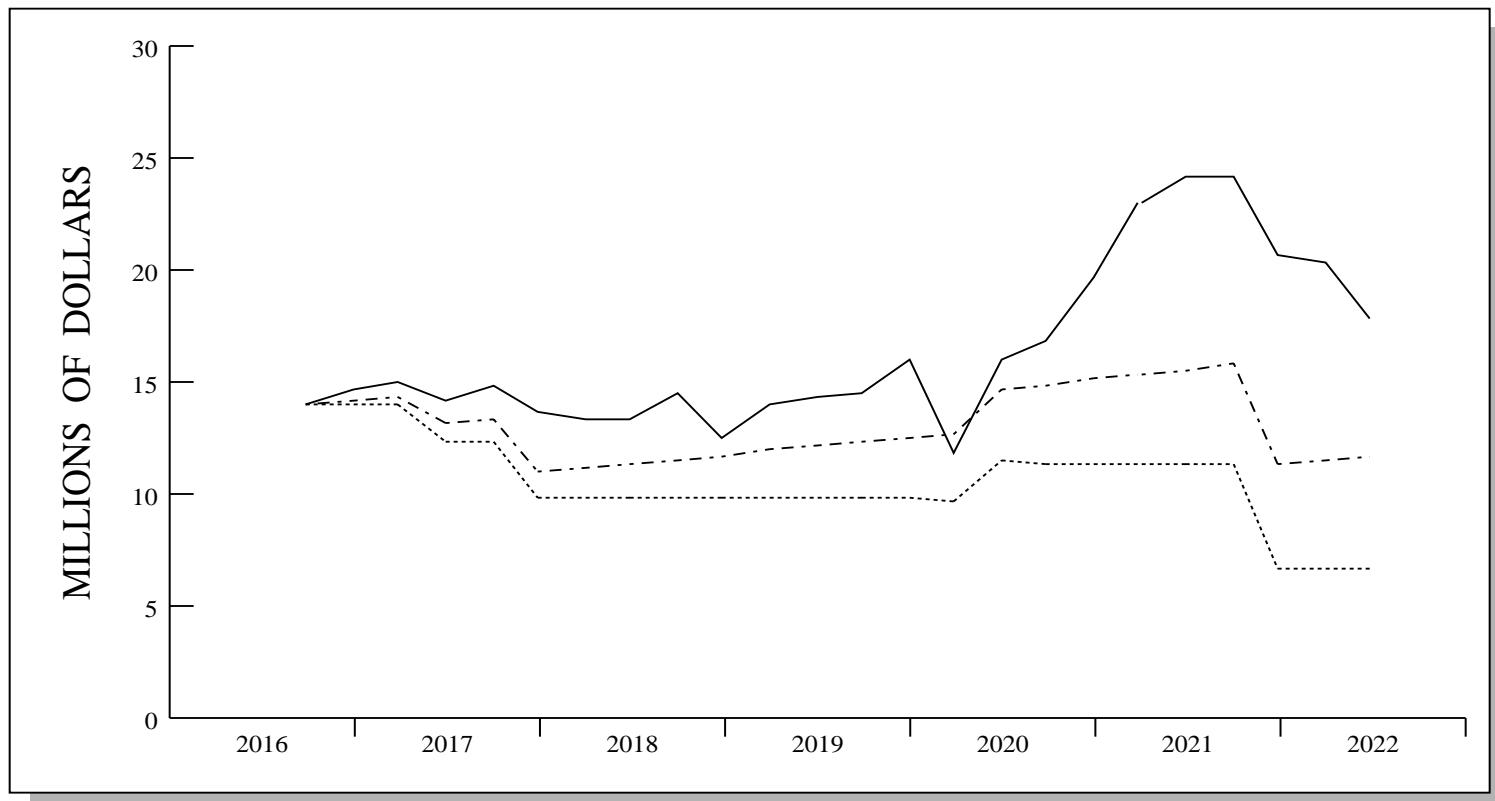

Results were mixed to slightly positive in the second quarter. Selection in the underweight Information Technology sector was strong, while an overweight to underperforming Materials stocks was a negative contributor. The heavily overweight Consumer Discretionary and Financials sectors matched the benchmark's heavy losses. These effects were offset somewhat by an overweight to the steady Health Care sector. The portfolio produced a surplus return of 10 basis points in the second quarter.
