September 16, 2024

Dear Alexandria Community Members:

The City of Alexandria has contracted AECOM to study and design the Mt. Vernon Dual Corrugated Metal Pipe Replacement Project.

Investigation of the corrugated metal dual culverts is expected to occur for a duration of one week on the last week of September. This letter is to inform you that beginning on September 23, 2024, AECOM intends to enter on or near your property for the purpose of assessing City stormwater infrastructure to collect data. This data will be used in conjunction with a City of Alexandria design project pertaining to Mt. Vernon Dual Corrugated Metal Pipe Replacement Project. This investigation is a non-invasive form of mapping; no impacts are expected on your property. AECOM will be performing a manual investigation of corrugated metal dual culverts, LiDAR scan of pipes' entrances, measuring deformed crowns, and identifying areas needing repairs. This investigation will be within the City's right of way and easement area. Furthermore, this letter does not imply that your property is to be impacted by this project. The purpose of this letter is solely to provide notification that temporary access to your property may be needed for surveying and mapping purposes. You do not need to be present for this procedure. If you have property tenants, please pass along this notice, or inform them of the survey. If you have any questions about the procedures associated with this notice, or any special instructions or precautions pertaining to your property, please call **Chad Wyzga at 301.944.3619** for field operations.

Maintenance of traffic control and lane closure is not expected as part of this activity.

If you have any questions about the scope of this City of Alexandria project, please contact me at wael.eltayeb@alexandriava.gov or 703.746.4217 (Office). Thanks in advance for your cooperation and have a great rest of your day.

Sincerely,

Wael Eltayeb, P.E.
