

# Stormwater Utility and Flood Mitigation Advisory Committee Sep 18, 2024 | 6:00 p.m. | Hybrid (Virtual and In-Person) Meeting

# **Minutes**

# **Advisory Group Members Present:**

V	John Chapman	V	Howard "Skip" Maginniss
P	Dino Drudi	P	Brian Sands
P	John Hill (Chair)	P	Janette Shew
A	Cheryl Leonard	A	Christine Thuot
P	Chris Ferrara	P	Katherine Waynick (Vice-Chair)

## **Staff Present:**

V	Brian Rahal, T&ES Civil Engineer IV	V	Haweni Gobena,
P	Dan Medina, DPI Stormwater Program	P	Jesse Maines, T&ES Division Chief,
	Manager		Stormwater Management
P	Emma Wheeler, T&ES Communications	V	Jessica Lassetter, T&ES Civil Engineer III
	Office		
V	Erin Bevis-Carver, Sanitary Infrastructure	P	Jonathan Whiteleather, DPI Technical
	Division Chief		Project Manager
V	Felicia Montoney, T&ES Management	A	Lisa Jaatinen, T&ES Civil Engineer IV
	Analyst I		
A	Alex Haptemariam, DPI Senior Technical	P	Mitch Dillon, DPI Associate Technical
	Project Manager		Project Manager
P	Wael Eltayeb, DPI Technical Project	P	Terry Suehr, DPI Director
	Manager		
V	Mujeeb Atefi	P	Rami Chehade, DPI Deputy Director
			- '

P = Present A = Absent V = Virtual (on call)

# **Tonight's Agenda**

- 1. Welcome remarks from Chair (6pm, 5 min)
- 2. Approval of minutes (Committee) (6:05pm, 5 min)
- 3. Update on Flood Action program (City staff) (6:10pm, 30 min)
  - Large capacity projects
  - Combined sewer projects
  - Spot improvements
  - Sanitary Sewer Asset Renewal Program
  - Communications
  - Maintenance
  - Flood Resilience Plan
- 4. Discussion of Summer 2024 storms (all) (6:40pm, 10 min)
- 5. First Street modeling (all) (6:50pm, 10 min)
- 6. Committee workplan and outreach activities by members (Committee) (7:00pm, 10 min)
- 7. Committee memo in support of FY2026 stormwater fee (Committee) (7:10pm, 10 min)
- 8. Public comments (7:20pm, 20 min)
- 9. Adjourn (7:40 pm)

#### 1. Welcome remarks

#### 2. Approval of minutes

Minutes approved.

#### 3. Update on Flood Action program

#### **3a.** Large Capacity Projects (Presented by Jon Whiteleather)

# Flood Action Progress Report: Large Capacity Projects & CSS

- Commonwealth/Ashby/Glebe (est. \$50M) Large capacity flood mitigation. Progressing 90% design.
  Continuing coordination with utility companies for relocation design and responsibility. Exploring
  alternative alignment and foundation designs as a cost savings measures. Public frequently asked
  question (FAQ) document has been posted on the project webpage.
- Hooffs Run Culvert Bypass (est. \$60M) Large capacity flood mitigation. Fieldwork component of field survey along Russell Road is complete. Developed model to investigate possible solutions and determine feasibility. Two flow monitoring sites selected. The data collected will allow improvement of the hydraulic model.
- Pitt & Gibbon (\$20-25M) CSO surcharge mitigation. Survey completed. Alternatives assessment ongoing. Exploring opportunities to increase level of service provided.
- Nethergate (\$5M) CSO Surcharge mitigation. Additional dye testing and inspection of local
  connections performed last period. Collapsed pipe found in private system. City team to finalize
  planning and move to design stage.

2

Review of the Flood Action Progress Report was finalized over the summer.

### Commonwealth/Ashby/Glebe:

- Coordinated design and are now working to establish formal agreements with utility companies.
- 60% cost estimate was over budget. The city has been exploring alternatives to reduce cost
  - o Main cost driver: Foundation design required due to poor soils near outfall.
  - Solution:
    - Shifting culvert into ball field avoids vertical constraints of overhead power lines. This allows for use of cheaper foundation design.
    - Over-Excavation: will replace poor soil below plan level with crushed stone mat instead of piles (less expensive). May result in more settlement but is tolerable as culvert is outside roadway.
- Utilities: must reroute utilities located in culvert before excavation can begin (neighboring utilities can remain). Rerouting could be done by City's contractor or the utility companies.
- Public Outreach:
  - o In response to Open House, the city posted an FAQ page, which will be included in the newsletter.
  - Will have follow up public meeting after 90% design, followed by design revisions and City review.
- Keeping to original construction procurement date of June 2025
  - Construction procurement to begin in Summer 2025. Construction start estimated for Summer 2026.

#### Questions/Comments:

- (Waynick) Determine whether motorcade/security would impact project.
- (Drudi): Consider whether an extreme storm event would cause overflow into Four Mile Run and undo environmental remediation work. Is there an environmental impact statement (EIS) requirement?
  - o Response: Addressed concern in design included rip-wrap and followed VDOT guidelines. Working with Army Corps of Engineers.

To-do: Check if is included in FAQ. Waynick and Leonard will take lead on public outreach.

# **Hooffs Run Culvert Bypass:**

- Completed fieldwork along Russell Road.
- Developed model to assess storage and capacity improvement alternatives.
  - Alternative considers underground storage in areas of flooding and upsized conveyance pipes. Pump station not feasible
  - o Construction date: July 2026
  - o Culvert is working well
- Added flow monitoring sites to assist model and collect data.

Question (Waynick): Whether will need to repurpose properties for storage.

- City must assess legality.

To-Do: At request of Councilman Chapman, provide document summarizing process for buyouts to inform committee recommendations during budget season (include success examples). Hill will take lead on public outreach.

**Pitt & Gibbon CSO Surcharge Mitigation:** Completed survey over summer. Exploring options with higher level of service (not meeting 10-year storm threshold).

To-Do: Thuot will take lead on public outreach.

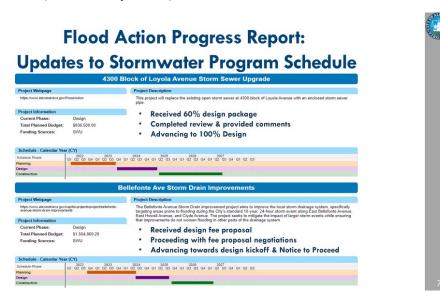

#### **Nethergate CSO Surcharge Mitigation:**

- Conducted survey of condo neighborhoods to assess sump pump laterals (many homeowners experience backwater) and understand potential impact of proposed alternative on residents before moving to design stage.
  - O Completed survey week of 09/09/24. Closing out planning phase.
  - o Survey allowed to explain project to residents, including its limitations.
- Found collapsed pipe in private ROW, alerted condo board.
- City in contact with president of condo administration who is disseminating updates to residents.

Input (Drudi): Suggested hosting semi-public meeting to inform residents of project.

To-Do: Drudi will take lead on public outreach.

### **3b.** Spot Improvements (Presented by Dillon)

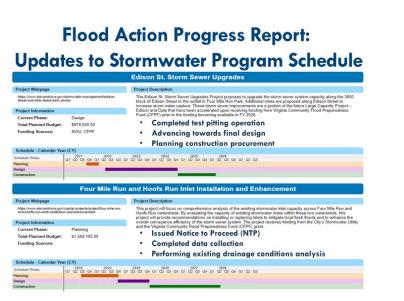

The program includes 13 projects. Slides include plan budget, description, updates, and timeline (note: start of construction indicates start of construction procurement). Updated as of 09/01/2024.

- 1. 4300 Block: Targeted at one property where open system transitions to closed system. Received 60% design comments. Construction is set for 2025.
- 2. Bellefonte Ave: Project goal is to provide conveyance of 10-year, 24-hour storm event. Received design fee proposal and are proceeding with fee negotiations.

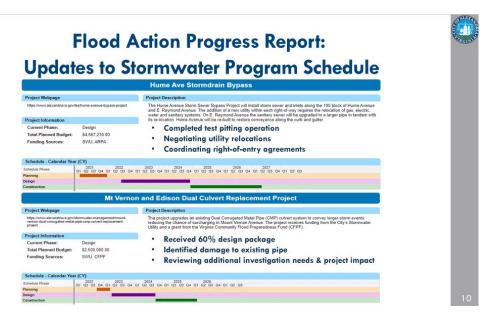

- 3. Clifford Ave: Depressing roadway to convey flow. Stone storage and concrete pavers provided for additional benefit.
  - a. Impact to trash collection (Waynick): will have plan by 30% design. Dropping by 4 inches.

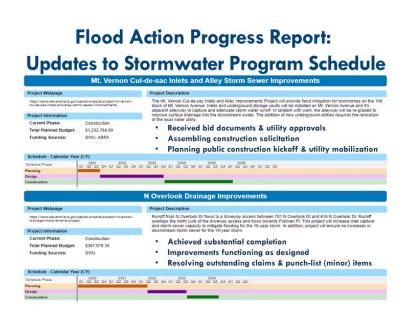

- 4. Edison St: Completed test pitting (15 borings) with no conflicts. Advancing towards final design and planning construction procurement. Construction may start Summer 2025.
  - a. Design consideration (Waynick): add backwater preventors to pipe.
- 5. Four Mile Run: Issued NTP and completed data collection. Now, conducting drainage analysis assessment, which will inform enhancements. Hope to standardize watershed upgrade process.

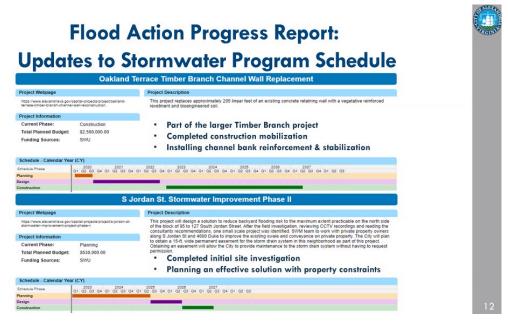

- 6. Hume Ave: New storm sewer on Hume Ave (42 in.) and East Raymond to increase capacity and prevent water pooling in backyards (though some capacity limitations downstream).
  - a. Completed test pitting identified mild conflicts that should be able to be resolved. The City is negotiating utility relocation on East Raymond St with Dominion, Washington Gas, and Telecom companies, and right-of-entry with Truist Bank.
  - b. Construction Procurement: 2025, will need to relocate certain utilities ahead of construction.
- 7. Mt Vernon and Edison: Due to identification of additional culvert damage during 60% design review, City is investigating structural integrity of culvert and will then slip line with high-density polyethylene to increase discharge rate.

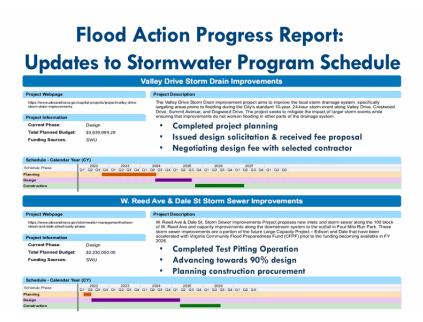

- 8. Mt Vernon Cul-de-sac: Intend to install underground stormwater storage. Completed design. Received bid documents, engaged utility providers, and are assembling construction solicitation (likely invitation to bid instead of on-call). One utility provider will need to mobilize before construction.
  - a. Public kickoff: Fall or Winter 2024
- 9. N Overlook Drainage Improvements (behind Beverly Hills park): Functioning as designed, a few surface issues are being addressed.

- 10. Oakland Terrace (part of Timber Branch project): Converting 205-foot concrete retaining wall to a vegetative reinforced revetment. Under construction.
- 11. S Jordan: Completed site investigation. Site is constrained property that abuts residential properties.

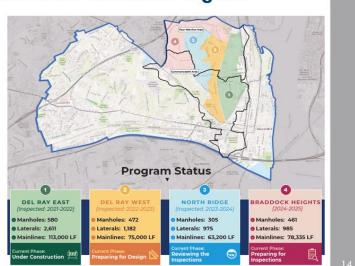

- 12. Valley Drive: Finished planning, selected design contractor, and are negotiating fee.
- 13. W Reed Ave and Dale: Impacted by need for test pitting. Clarified sewer and sanitary crossing and can advance to 90% design.

# 3c. Sanitary Sewer (Presented by Bevis-Carver)

# **Sanitary Sewer Asset Renewal Program**

- Del Ray East Sewer Rehabilitation:
  - Contractor issued Notice to Proceed Oct 16, 2023
    - Contract period = 1 year
    - To be extended until mid-January 2025
  - Construction progress:
    - · 80% pipes lined
    - · 98% manholes rehabilitated
    - Lateral sewers under separate contract

- Del Ray East:
  - In May: 70% of pipes had been lined. Now 85% (15-20% of pipes left). Several lines require temporary construction easements.
  - O Contractor shifted to manhole rehabilitation and replacement (some not to standard). Therefore, updated schedule with goal to finish by end of 2024 / mid Jan 2025.
- Del Ray West: Design phase.
- North Ridge: Completed inspections, determining which manholes require rehab.
- Braddock Heights: Starting inspections in Fall 2024.

# 3d. Communications (Presented by Wheeler)

# **Communications**

- 26Total Flood Action/ Stormwater social media posts in June-August
- Impressions: 96,496 decreased by 35%
- Engagements: 1,806 decreased by 64%
- Post link clicks: 156 decreased by 70%
   \*Compared to previous 3 months (March-May)
- 8,322 Stormwater Management webpage views
   \*86 total pages under Stormwater Management web group
- Average engagement rate: 57.6%
- Most popular stormwater webpages:
  - Flood map = 1,419 views
  - Flood Action = 867 views
  - Types of Sewer Systems = 677
- Social media: all flood actions go to general page. Overall decrease.
- Popularity of webpages is consistent, lots of links attached, common starting point

Question (Waynick): SCO.

• City doesn't have SCO capabilities. Switched analytics system. Saw engagement spike during SWOO application window.

To-Do (Waynick): Tell members how can help.

3e. Maintenance Activities (Presented by Dr. Medina)

# **Maintenance Activities**

- Hooffs Run Culvert Maintenance
  - Pre and post storm inlet inspections and cleaning ongoing.
  - Sediment removal is being coordinated with AlexRenew.
  - Anticipated to start in Fall 2024.
  - · Culvert maintenance package from Linden Street to Duke Street
    - · Request for Quotes sent to contractors on September 12th.
    - · Quotes to be submitted by October 1st.
- Linden Street Alley Storm Sewer Project:
  - · Construction completed in August 2024.

Best practice: Every 3 years. Inspected Hooffs culvert 1-2 years ago, deemed cleaning not necessary.

Comment (Hill): Running robotic cameras before and after cleaning provides evidence of progress and the need for consistent maintenance schedule. Effective with community members.

#### 3f. Flood Resilience (Presented by Lassetter)

# Flood Resilience Plan

- City awarded \$525,000 from Virginia Community Flood Preparedness Fund (CFPF)
  - 75/25 match with Stormwater Utility providing \$175,000
  - Total project estimated at \$700,000
- Make the City more resilient and address
  - Hazard identification, flood mitigation, flood preparedness and response, policies and regulations, funding strategies, and communications
- Include efforts to reach communities with barriers to access
- · Engaging impacted community members

Update: Awarded in July, funds in September. City holding kickoff meeting with technical experts.

3g. Flood Mitigation (Presented by Montoney)

# **Flood Mitigation Grant Program**

- Program started July 1, 2021.
- In FY2022, we had 148 approved applications for a total of \$588,163.58 reimbursed.
- In FY2023, we had 73 approved applications for a total of \$167,538.49 reimbursed.
- In FY2024, we had 101 approved applications for a total of \$235,145.16 reimbursed.
- So far in FY2025, we have 16 applications in various stages with a total of \$2,985.00 reimbursed.

18

FY2025: 25 applications (not 16). Paid out \$235,000 disbursed.

• Capital fund: added \$750,000 per year. Considering reallocating.

To-Do: Determine balance in fund. Better advertise fund so residents know exists.

4. Summer Storms Mitigation (Presented by Rahal)

# **Thunderstorms 2024**

 National Weather Service (NWS) WARNINGS April 15, 2024 – August 9, 2024

Relatively uneventful. A few events in July caused flooding at Commonwealth and East Glebe. Hurricane Debbie resulted in some flashflood warnings, but culverts were able to contain.

Comment: Further evidence of benefit of culvert cleaning program.

Sensors (Hill): Shows improved performance of culverts due to cleaning. Demonstrates why need sensors, important to share with community.

Comment (Waynick): Good to install sensors at Commonwealth Ave.

# 5. First Street Modeling (Presented by Rahal)

First Street is a for-profit firm that delivers flood map products. Citywide subscription (staff and public) would cost \$200,000 per year.

• Alternative: Flood Resiliency Plan includes citywide vulnerability assessment – would provide more context-specific and higher resolution data. Positive: City can perform own flood risk assessment.

Comment (Sands): Beneficial to consider multi-hazard approach. Important to inform residents of vulnerability, is part of committee's responsibility and ethical duty. Appreciate need to balance with potential liability requirements, but increased public understanding can contribute to political will.

## 6. Committee Workplan (Presented by Hill)

ALEXANDRIA		oposed Work Plan for 2024-2025							
Work Stream	Purpose	Activities & Deliverables							
	1 orpose								
Community	To increase residents' awareness of and	Maximize resident awareness and attendance at all community meetings regarding these projects:  - Commonwealth/Ashby/Glebe - Netheragte							
Awareness	involvement in the projects planned in their neighborhoods	- Hooff's Run Bypass - Miscellaneous Spot projects - Pitt & Gibbon							
		Place special emphasis on residents most impacted by these projects. (Throughout the year)							
Business Involvement	To better understand the impact of stormwater and flooding issues on Alexandria businesses and design appropriate miligation strategies.	Targeted updates to the Alexandria business community impacted by stormwater flooding.							
Assessing Plans &	To report to Council whether the appropriate level of funding is allocated to the most effective storm-and floodwater militarition projects.	A statement in support of the Stormwater Fee increase that briefly summarizes past storm season and the need for continued investment (October).							
Budgets		A budget season report – and testimony – on the progress of the stormwater mitigation program overall, with an emphasis on expenditures to-date and planned investments. Answer the three questions raised in our 2023 report. (March to May).							
Informing	To provide the perspective of residents and businesses as City staff works with Council and our state	Contribute relevant stormwater proposals to the City's legislative package to Richmond (September)							
City- and	representatives in shaping policies regarding storm-	Engaging and coordinating with other City organizations concerned with water-related issues (on-							
State-level	and floodwater mitigation	going)							
Policies									

To-Do: Connect neighborhood with relevant projects. Notify committee how can support legislative items and/or grant funding package submissions.

Budget: Need statement in support of Stormwater Fee increase and a budget season report.

# 7. Committee Memo in Support of FY2026 Stormwater Fee

Stormwater Utility 10-Year Plan: FY 2025 - FY 2034

	Approved FY	Proposed FY									l e	FY 2025 - FY

- Capital Improvement Program (2026): Equivalent residential unit fee to increase from \$324.10 to \$340.30 (5% increase), will generate ~67 million. Aligns with project needs.
- Discussion: Drudi: Should be flat 5% fee every year. Hill and Waynick: Favor annual determination of fee. Waynick: Projects are justification for increase in percentage. Sands: Sensors are critical evidence. Hill and Waynick: Important to capture baseline data.

Citizen advisory committee: Motion to approve 5% rate increase from \$324.10 to \$340.30 for FY2026.

Motion by Brian Sands. Seconded by Katie Waynick.

- Sands: Moved motion to authorize [John Hill] to write letter in support.
- Waynick: Seconded.
- All in favor say aye: Aye.
  - o No opposed. No abstentions.
- Moves.

Hill to write memo.

### 8. Public Comments

Drudi: Prior meeting minutes did not include staff Jesse Maines and Terry Suehr as present. Need to address.

John Craig (resident): Area surrounding townhouse has flooded several times. House has not flooded because spent \$160,000 on mitigation: excavated and waterproofed front and side foundation. Added external sump pump and three additional internal pumps. Waterproofed walls, increased pumping capacity by 300% on inside, and outside. Braddock Rd has since experienced three floods.

Drudi: Suggestion to relocate crosswalk halfway up West St and to have permanent sandbags on Braddock Rd until find permanent solution.

Hill: Suggest establishing project instead.

Waynick: New development along Braddock has increased pipe size. Potential opportunity to add storage during construction. Constraint: Metro station.

Dr. Medina: New development is doing addition water retention due to ordinance.

Mr. Craig: Sued city over Braddock underground storage because concluded would not improve flooding in area, which violated Braddock Small Area Redevelopment Plan mandate that any new development provide additional outfall so wouldn't flood. City responded that can't expect private developer to pay for stormwater management (but can require that pay for sewer improvements). City studied three options – storage, conveyance, and a combination (costing \$32.5 million) – but did not consider improving outfall to Eastwood / Berlin St.

Drudi: Recommended that Braddock Rd be added to priority list, was received by City Council, want to determine why wasn't adopted. Braddock is a key intersection and impacts large number of residents, should consider direct and indirect impacts. Must assess formula.

Hill: Need to get response. Will provide support to stormwater fee in October. Request city staff analyze issue and propose solution (could be 10 years out). Must incorporate in pipeline.

Waynick: Need to address systematically.

Meeting adjourned at 8:39PM by unanimous vote.
