Executive Summary

This is the second round of quarterly progress reports being developed via the City's new Project Management Information System, AlexPM. Project Managers (PM) are using AlexPM for the day-to-day management of their projects, allowing scope, schedule, and budget progress data to be pulled into a Project Progress Report. Details on data included in the Project Progress Report are provided in the Report Overview section below.

Projects are categorized based on their complexity rating. The City's complexity rating system analyzes multiple elements of a project risk and informs the level of governance required for the project.

- Red <u>These projects will report progress every quarter via the full Project Progress Report.</u> Project is very complex with high visibility, and a high level of oversight is required. A project manager with significant experience should be assigned to the project. The Project Management Standards will be required. The budget must be at the project level.
- Amber For this first quarter, these projects will report progress via an abbreviated report. In future quarters, these projects will report progress via the full Project Progress Report. Project has moderate complexities, with some visibility and a moderate level of oversight is needed. A trained project manager with experience should be assigned to the project. Project Management Standards will be required, with some appropriate scaling. The budget must be at the project level.
- Green <u>These projects will not produce a Project Progress Report.</u> Project is relatively straightforward with few complexities, and less oversight is needed. An entry-level Project Manager may be assigned. The Project Management Standards may be used but are not required. The project may be budgeted at the program level. Use of the PMIS is not encouraged.

Report Overview

All active Amber and Red complexity projects are being reported using the AlexPM Project Progress Report for FY 2024 Third Quarter (through March 31, 2024). Project progress tracking is now available via a geographic based platform: <<u>https://alexgis.maps.arcgis.com/apps/dashboards/2a448a4307284eb5b0de9b304b5634ee</u>>

Alexandria City Public Schools (ACPS) produces a quarterly capital projects status report which can be found at: <u>http://www.acps.k12.va.us/</u>.

The progress report contains the following information:

Report Date - Date the report was printed.

Project Webpage – Hyperlink to webpage providing additional project information.

Project Name – Established at the beginning of the project and maintained throughout the project life.

PMIS Project Number – Internal tracking number to ensure accuracy of reporting data between systems.

<u>Sponsor Department</u> – The organization unit that identifies the project need, advocates for its approval, and typically leads the initial planning effort, including pre-funding analysis. Often the organization that will operate and maintain the asset after project completion.

<u>Managing Department</u> – The organization unit that provides delivery or implementation of the project during Design and Construction phases.

Current Phase -

• Planning Phase – The phase of a project during which the project scope is determined, the desired schedule is built, the budget is calculated, the funding is obtained, and sponsor and leadership approval is secured.

Planning Phase: 40% of active AlexPM projects.

• Design Phase – The phase of a project during which the design for the end product is developed. For construction projects, this typically involves developing construction drawings and specifications. A typical technology project uses this phase to define the technical details of the project that may include screen designs, databases, sketches, system interfaces, and protypes that enable final product design decisions.

Design Phase: 33% of active AlexPM projects.

• Construction Phase – The phase of a project when the final product is built and implemented. For construction projects, this involves construction of the designed improvement, repair, or new infrastructure in accordance with the approved drawings and specifications. Technology projects will often develop, test, and deploy the product during this phase.

Construction Phase: 27% of active AlexPM projects.

Project Status - Indication of whether project is Active, On-Hold, Cancelled, Pending Close-out, or Closed.

Project Description – A brief narrative of the intended project. This may include purpose and expected work.

Current Progress – A narrative description of progress made on the project since the last reporting period.

Schedule - This provides a high-level view of the project's planned schedule, by phase.

Current Performance: 88% of active AlexPM projects are on or ahead of schedule.

Explanation of Schedule Variance – Narrative explanation of how the project is progressing against the intended schedule.

Cost Metrics (by phase) -

- [Phase] Phase Budget The portion of the total project funding that is allocated to this phase.
- Actual Costs All costs incurred to this phase through the end of the reporting period.
- Percent Spent Actual Costs divided by Phase Budget.

Current Performance: 100% of active AlexPM projects are spending within current appropriated budget.

- Work Progress (%) Weighted average of all tasks work progress through the end of the reporting period. This
 includes tasks that incur costs from vendors and work that is performed by City staff. Thus, it will usually not align
 with the percent spent.
- Explanation of Cost Variance A narrative evaluation of the cost performance and explanation of any variances.

Communication -

- Completed Public Communication List or description of the public communications completed during the prior period.
- Planned Public Communication List or description of the public communications planned for this period.

One of the more challenging elements of the transition has been integrating project-based budgeting and financial management into a financial system that is program-oriented. Please note that some of the budget data reported in Project Progress Reports is still in process of being re-aligned for the AlexPM system. The Capital Funds Financial Summary will be maintained for accountability until project budgets are finalized and reconciled.

Capital Funds Budget and Financial Information Overview

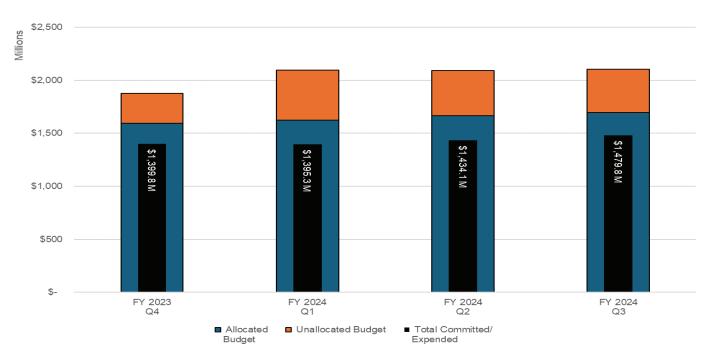

The total City Council appropriated budget for all projects for all years contained in this report is **\$2.10 billion**. Approximately **70.4% (\$1.48 billion)** of all appropriated funding for the projects included in the quarterly status report has been expended or contractually committed leaving the available projects balance of **\$622.3 million** as of **March 31, 2024**.

A by-project summary of project budget and expenditure information can be found at the end of this report in the Capital Funds Financial Summary.

Allocated vs. Unallocated Funds

In the City's capital budgeting and management procedures, projects are required to go through the capital allocation process to transfer appropriated capital funds to individual projects. This allows City budget and finance staff to monitor the progress of projects and ensure that project activities are most appropriately aligned with funding sources available for each project. After completing this process, capital funds are considered "allocated." Funds/projects that have not gone through this process yet are considered "unallocated." Capital project managers submit allocation requests to the Office of Management & Budget on a monthly basis.

The chart below provides a summary of appropriated capital funds tracked in this quarterly status report (separated by allocated and unallocated funds) and the amount that has been committed or expended as of **March 31, 2024**.

At the end of the **third** quarter of **FY 2024**, active projects had combined project balances of **\$622.3 million**. The table below compares project balances at the end of the last three fiscal quarters.

| Available Project | Available Project Balances | | | | | | | | | | |
|-------------------|---------------------------------|---------------------------------|---------------------------------|---------------------------------|--|--|--|--|--|--|--|
| | End of 4th Quarter (FY 2023) | End of 1st Quarter (FY 2024) | End of 2nd Quarter (FY 2024) | End of 3rd Quarter (FY 2024) | | | | | | | |
| Totals | \$477,979,075 | \$699,224,410 | \$658,133,305 | \$622,272,351 | | | | | | | |

| Managing Department | General Services |
| Current Phase | Construction |
| Project Status | Active |
| | |

Project Description

Demolition and reconstruction of a non-habitable burn building for the Alexandria Fire Department (AFD). A new burn building will provide more training opportunities for AFD other than basic fire scenarios and a safer training environment.

Current Progress

The project's design received City DSUP permit approval in February 2024. Construction procurement ITB package was completed and sent in March 2024 for review. The construction contract is expected to be awarded in Summer 2024

| Schedule | | | | | | | | | | | | | | | | | | | | | | | | |

| Construction - Actual | | | | | | | | | | | | | | _ | _ | | | | | | | | | |
| | | | | _ | _ | | | | | | | | | _ | | | | | | | | | | |

Explanation of Schedule Variance

Schedule progress is consistent with plan.

Cost Metrics Planning Design Construction Planning Phase Budget Percent Spent **Design Phase Budget** Percent Spent Construction Phase Budget Percent Spent \$0.00 0% \$275,400.00 78% \$3,476,921.00 0% Work Progress Work Progress Work Progress Actual Costs: Actual Costs Actual Costs \$0.00 100% \$215,500.00 99.47% \$0.00 3.85%

Explanation of Cost Variance

The design cost variance is due to the fact that the total design fee includes ongoing services that extend into the construction phase, which is yet to commence. The design cost includes the bidding administration and construction administration service in the subsequent construction phase.

Communication

Completed Public Communication

A community reach-out meeting was held in Fall 2023. The project was approved by City Council in October 2023.

Delivery Date A community meeting was hold in Oct

Planned Public Communication The community will receive the notice when the construction is going to start.

| Project Name | PSC Main Kitchen Renovation | Project Description |
|---------------------|-----------------------------|---|
| PMIS Project # | 23038 | The proposed renovation for the Public Safety Center Kitchen is designed to transform the existing facility into |
| Sponsor Department | Sheriff's Office | a state-of-the-art space capable of efficiently producing 1,500 meals daily. Focused on enhancing the overall environment, the comprehensive redesign prioritizes safety, security, and the well-being of both staff and |
| Managing Department | General Services | inmates, fostering a healthy and secure atmosphere. The plan incorporates dedicated spaces and conditions to |
| Current Phase | Construction | meet the highest standards of food handling and preparation, along with the integration of new mechanical, electrical, and plumbing systems for optimal functionality. Expansion of storage areas and the implementation |
| Project Status | Active | of advanced environmental controls ensure ideal conditions for food storage. The reconfigured work spaces and redesigned equipment layouts aim to overcome current challenges, providing a more streamlined and effective kitchen operation. Emphasizing readily accessible layouts for cleaning and maintenance, the renovation plan aims to create a modern, efficient, and safe culinary facility that addresses current shortcomings comprehensively. |

Current Progress

The mobile kitchen is installed and operational, the majority of the demolition work has been completed. The project is now shifted towards construction of new walls to include the installation of mechanical, electrical and plumbing systems.

| Schedule | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|-------------|--|------|-------------|---|-------|-----------|--|------|-----------|-------|--------------|----|------|---------------|----|----|-----------|----|--------------|------|-----------|----|

| | | | | | | | | | | | | | | | | | | | | | | | |
| | | | | | _ | - | | | - | | - | | | | | | | | | | | | |

Explanation of Schedule Variance

Schedule progress is consistency with plans

| Cost Metrics | | | | | | | | | | |
|-----------------------|---------------|---------------------|---------------|---------------------------|---------------|--|--|--|--|--|
| Plann | ing | Desi | gn | Construction | | | | | | |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent | Construction Phase Budget | Percent Spent | | | | | |
| \$0.00 | 0% | \$0.00 | 0% | \$2,975,305.00 | 0% | | | | | |
| Actual Costs: | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress | | | | | |
| \$0.00 | 100% | \$0.00 | 100% | \$0.00 | 36.47% | | | | | |

Explanation of Cost Variance

As a result of the City's recent transition to a new project management system, in-progress projects do not have cost data displayed for previously completed phases. Please see the Capital Funds Summary for CIP funding and cost data. Despite having completed 36.47% of the work for this project, the actual cost incurred thus far stands at \$0.00. This anomaly can be attributed to the fact that the vendor responsible for executing the project has not yet invoiced for the work completed up to this point. Consequently, despite significant progress in terms of completion, no financial transactions have been recorded due to the absence of invoices from the vendor.

| Managing Department | General Services |
| Current Phase | Design |
| Project Status | Active |
| | |

The renovation of City Hall and Market Square Garage and Plaza will involve the replacement of outdated heating, ventilation, and air conditioning systems, life safety and IT systems in addition to structural repairs in the Market Square garage. The interior of City Hall will be renovated to provide a modern work space for staff and better efficiency in serving the public. Other improvements will also be done to the Plaza to address waterproofing issues and create opportunities to expand its current programming and use.

Project Description

Current Progress

The City received pricing proposals from several interested firms for owner advisor services and architectural and engineering services. The City has issued a notice of intent to award the owner advisor services contract. The design pricing proposal will require additional fees negotiation before the contract is awarded. Test fits of swing space locations to relocate City Hall employees during the future construction is still in progress and nearing completion.

Project Description

The redevelopment of Landmark Mall includes public infrastructure dedication. The public infrastructure will be designed and constructed by the Developer, with funding contribution by the City. The City is providing construction inspection and oversight to verify completion per approved plans, before authorizing release of funding.

Current Progress

Contractor has installed Storm Pipes, Sanitary Sewer Pipes, Duct banks, Communication Conduits, Sidewalks, Asphalt and Concrete Roads and Street Lights.

| Schedule | | | | | | | | | | | | | | | | | | | | | | | |

Waterfront Small Area Plan Implementation 20190 City Managers Office Project Implementation Design Active

Flood mitigation project spanning from Duke Street to Queen Street to address stormwater and riverine flooding along the Potomac River Waterfront. The project will provide increased capacity stormwater infrastructure, including pump stations, to better convey more intense storms, to prevent tidal influence from backing up into streets and preventing effective stormwater discharge. The project will increase shoreline protection to prevent the most frequent tidal and riverine flood events.

Project Description

Current Progress

Additional site investigations and cost estimates for various alternatives were developed. A draft of the Basis of Design Report was received for initial City and advisor review, including an initial cost estimate for options identified during the alternatives evaluation. The initial Alternatives Evaluation was completed and initial phase of Scoping to Budget will continue in March and April. Coordination continues with federal agencies to inform the National Environmental Policy Act (NEPA) Process (two Categorical Exclusions with no federal public comment period required or anticipated). Several public updates and presentations were provided at Waterfront Commission, Parks and Recreation Commission, and at a public open house. A deed modification was requested from National Park Service to eliminate the height restriction in Waterfront Park for public infrastructure.

on their use and needs of the WebAJIS platform.

The Alexandria Justice Information System (AJIS) provides multiple City agencies and the law enforcement community with access to civil and criminal court information, inmate management data, mug shots, documents, and reports. This project will replace the 20+ year old system while maintaining all current functions and modernizing business processes.

Project Description

Current Progress

Replacing the AJIS system is a high priority project for the Information Technology Department. In Quarter 2 of FY 2024, staff continued to migrate Circuit Court data to the Commonwealth's Supreme Court Case Management System, migrated data to the Alexandria Sheriff's Office Jail Management System, worked on designing the Commonwealth Attorney's eProsecutor system and began contract negotiations for a new warrant module. The City additionally began the development of a data hub to recreate the integrated feel of the previous AJIS system.

| | Schedule | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|----------|------|------|----|----|------|------|-----|-----|------|----|----------|----|------|----|----|----|------|------|------|------|------|-----|-----|------|----|----|----|----|--|

| Design - Actual | | | | | | | | | | | | <u>.</u> | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

The complexity of the data migration is a risk that is being actively monitored. The team plans to continue data conversion efforts for the Prosecutor module, VA State Court Case Management System and Jail Management System. The team has completed data requirements analysis for Hexagon RMS (Warrants) with business stakeholders. The historical AJIS data has been migrated to the data exchange/hub solution the team has begun to plan for connecting the new systems.

| Cost Metrics | | | | | | | | | | | | | | | |
|-----------------------|------------------------------|---------------------|---------------|---------------------------|---------------|--|--|--|--|--|--|--|--|--|--|
| Plann | Planning Design Construction | | | | | | | | | | | | | | |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent | Construction Phase Budget | Percent Spent | | | | | | | | | | |
| \$650,110.00 | 100% | \$185,862.64 | 100% | \$9,164,027.43 | 40% | | | | | | | | | | |
| Actual Costs: | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress | | | | | | | | | | |
| \$650,110.00 | 100% | \$185,862.64 | 100% | \$3,646,449.18 | 46.26% | | | | | | | | | | |

Explanation of Cost Variance

Cost variance indicators are progressing at the expected rate. Invoices are billed when pre-determined milestones are hit which is why the cost indicators may lag schedule indicators.

| PMIS Project # | 20581 |
| Sponsor Department | Emergency Communications & Alex311 |
| Managing Department | Information Technology Services |
| Current Phase | Construction |
| Project Status | Active |
| | |

Project Description This project consists of several specific goals spread over multiple fiscal years that are needed to maintain the radio system's current level of reliability, to add features, and to ensure sufficient capacity for radio system users, and implement radio management best practices.

Current Progress

The City Manager's Office has included a request for federal funding (\$650K). These funds would partially cover the cost of replacing law enforcement radios.

The project covers the construction of a City-owned and operated municipal fiber optic network plus required infrastructure that will interconnect a total of 87 public facilities consisting of City buildings, libraries, public schools, and other governmental institutions over approximately 40 miles.

Project Description

Current Progress

To date a total of 161,309 feet of conduit (94%); 562 Junction Boxes (92%) and 174,921 feet of Fiber (63%) have been installed.

| Project Status | Active |
| | |

This project is to renovate the lower level of the Ellen Coolidge Burke Library. The lower level was vacated by ACPS staff some time ago and does not meet the libraries operational needs. Programming and feasibility studies will be conducted for optimal resource allocation and design required for the program.

Project Description

Current Progress

Programming meeting was held with the Library staff, friends of the library and the architect. Follow up meeting with the architect was held on 4/19 to go over the test fit that was developed based on the confirmed program. Currently awaiting cost estimate and final pre-design report to determine final scope of the project.

1315 Duke Street Building Alterations 23041 Historic Alexandria Project Implementation Planning Active

Project Description

The Office of Historic Alexandria (OHA), in conjunction with General Services (GS), and Department of Project Implementation (DPI) intends to rehabilitate the Alexandria Slave Pen building (1315 Duke Street) acquired in March 2020 for use as a public museum.

Current Progress

The consultant team submitted the final comprehensive plan, which will be published on the project webpage upon the final review by staff. On April 30, the City will host the final public meeting to summarize the key findings and recommendations for rehabilitation of the interior and exterior of the building.

Project Progress Report

| Project Name | Douglass Cemetery - | Project Description |
|---------------------|--|--|
| | Stormwater Improvements and Restoration | Douglass Cemetery (the Cemetery), located at 1421 Wilkes Street, was established by the Douglass Cemetery Association as a segregated, nondenominational African American cemetery in 1895 and named in honor of |
| PMIS Project # | 20712 | Frederick Douglass. While the cemetery is abandoned, it is an important African American cultural resource |
| Sponsor Department | Historic Alexandria | and is maintained by the City. The cemetery floods frequently and the drainage issues are causing the ground level to sink and headstones to topple over. The dire condition has generated concern from the community and |
| Managing Department | Project Implementation | the families of those who are buried there. In the process of claiming the title of the Cemetery, the City has |
| Current Phase | Design | been responsible for maintaining the cemetery since the dissolution of the Douglass Cemetery Association in 1975. Addressing the underlying issues is an important step for the City in preventing further deterioration. In |
| Project Status | Active | addition to addressing the drainage issues, this project will generate a preservation plan to preserve and restore the site by improving the grave site conditions and landscape features. |

Current Progress

The consultant team conducted the archaeology fieldwork to ensure no burials were in the proposed disturbance area. The consultant team also submitted the initial grading plan to the City, and city reviewers provided review comments. A conservator is on board to assist the City in the conservation work before, during, and after construction. A public meeting was scheduled for April 9, and staff prepared presentation slides.

Project Description Murray-Dick-Fawcett House Restoration project intends to restore one of the earliest dwellings in the region to a museum and educational center focused on domestic life in Alexandria during the 18th and 19th centuries.

Current Progress

A Purchase Order was issued to the consultant team in February for the Murray Dick Fawcett House Master Plan. A project kickoff meeting was conducted in March, and a series of internal workshops and public meetings were scheduled to occur in the upcoming months. Information regarding the public stakeholder meeting is on the project website and City calendar.

| | Renovation | E. Simpson Park Renovation will deliver outstanding elements of the improvements scoped in the 2014 |
| PMIS Project # | 23050 | Citywide Park Improvement Plan including improved park access and wayfinding, additional onsite parking, |
| Sponsor Department | Recreation Parks & Cultural Activities | dedicated storage and concessions buildings, native landscaping and vegetated buffers and improved passive use areas. Additionally, the project will deliver drainage improvements at Little Simpson diamond sports field and synthetic turf at Big Simpson diamond sports field. New dugouts, bleachers, batting cages and press boxes |
| Managing Department | Project Implementation | will be installed at each field. As part of the project, an existing stormwater outfall on E. Monroe Ave will be |
| Current Phase | Design | connected to the downstream stormwater system. |
| Project Status | Active | |

Current Progress

The City is currently designing a renovation of Eugene Simpson Park. The approved plan will implement the recommendations of the 2014 Eugene Simpson Park Improvement Plan as amended in 2021. In March 2024, the City received the 100% design package from the consultant and began development of the Draft Invitation to Bid for construction procurement. Design review of the 100% design package will be completed over April. Design is scheduled to complete in Summer of 2024.

| Schedule | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|--------------|--|----|--------------|--|------|--|---------------|------|----|-------------|------|-----------|------|-----------|------|----------|----|----|--------------|------|-----------|----|

| PMIS Project # | 23009 |
| Sponsor Department | Recreation Parks & Cultural Activities |
| Managing Department | Recreation Parks & Cultural Activities |
| Current Phase | Design |
| Project Status | Active |
| | |

This project provides accessibility improvements through the relocation of the existing playground. The existing playground is located at the bottom of a steep hill without any means for access, and currently does not comply with ADA requirements. The project supports the 2015 Fort Ward Management Plan strategy to enhance Park accessibility and to meet ADA requirements.

Project Description

Current Progress

At the community meetings held on December 6 and 16, 2023, staff provided updates on the design process for the playground relocation. The presentation included an overview of the site constraints (cultural, natural and stormwater) and considerations for the preservation of the rifle trench, construction access, stormwater management, playground equipment and accessibility. The project team continues to develop the playground design concepts and anticipates holding a community meeting in late spring to obtain community feedback about the proposed playground design.

| Current Phase | Construction |
| Project Status | Active |

Project Description

This project will replace the currently closed bike and pedestrian bridge connecting the Four Mile Run Park parking area at Commonwealth Avenue with the main portion of the park west to Mount Vernon Avenue.

Current Progress

Active construction progressed with the Contractor setting the new bridge, pouring the concrete deck, placing riprap, and paving the approaches. Substantial completion of the project is anticipated in mid-April 2024. The final task to be performed is the installation of the railings at the approaches. The bridge is scheduled to open to the public by the first of May 2024.

Project Progress Report

| Project Name | Holmes Run Trail - Dora Kelley Fair-Weather Crossing Replacement with Bridge |
|---------------------|--|
| PMIS Project # | 20724 |
| Sponsor Department | Recreation Parks & Cultural Activities |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |
| | |

This project will replace the current fair-weather crossing for the Holmes Run Trail in Dora Kelley Park with a multiple-cell precast concrete box culvert to allow trail users continuous, safe, and reliable access to the City's off-street trail facilities.

Project Description

Current Progress

The design Consultant progressed the project by completing the surveying and geotechnical investigation and the 30% design. Staff reviewed the 30% design submittal and provided comments. The design Consultant is anticipated to submit the 60% design plan set in May 2024. City staff continued to maintain the trail closure at North Morgan and to provide project status updates on the project website.

Project Progress Report

| Project Name | Holmes Run Trail Flood Damage Repair (Sites 2 and 3) |
|---------------------|---|
| PMIS Project # | 20659 |
| Sponsor Department | Recreation Parks & Cultural Activities |
| Managing Department | Project Implementation |
| Current Phase | Construction |
| Project Status | Active |
| | |

Project Description

This project will provide for the design and repair of two sections of the Holmes Run Pedestrian and Bike Trail damaged as a result of heavy rains and flooding events in the fall of 2018 and summer of 2019.

Current Progress

Project encountered an extended procurement process due to the non-responsibility determination of the two lowest bidders. VA procurement law requires significant documentation and opportunity for bidders to contest these findings. Staff reviewed the experience submitted by the third lowest bidder and recommended them for award. The City issued a notice of intent to award letter on April 5. Active construction is anticipated to begin in late spring 2024. Staff also recorded the deed for temporary and permanent easement for Site 2 (bridge replacement located west of I-395). City staff continued to maintain the trail detour and to provide project status updates on their website.

Explanation of Schedule Variance

The construction procurement process was extended as a result of staff's determination that the first and second lowest bidders were non-responsible. Before moving to the third lowest bidder Staff had to ensure all Virginia Procurement processes were followed. This unanticipated extended procurement has delayed the start of active construction.

Project Progress Report

| Project Name | J. Hensley Park Renovation | Project Description |
|---------------------|---|--|
| PMIS Project # | 23051 | J. Hensley Park Renovation will deliver the first phase of improvements scoped in the 2013 Citywide Park |
| Sponsor Department | Recreation Parks & Cultural Activities | Improvement Plan for the Park. Phase 1 includes renovation of the upper diamond sports field into a synthetic turf diamond sports field and consolidation of the two lower, natural turf fields into one full size natural turf field. Sports lighting at both fields will be removed and replaced with a more efficient and effective sports lighting |
| Managing Department | Project Implementation | system. The existing bath house and maintenance facility will be removed and replaced with updated facilities. |
| Current Phase | Construction | Two new pavilions and a playground area will be installed. Park improvements will be supported with an expanded parking lot and stormwater management facilities. All park elements will be ADA accessible with the |
| Project Status | Active | improved wayfinding and pathway design for the park. |

Current Progress

The City is currently implementing a renovation of Joseph Hensley Park in phases. The approved construction plan will implement the recommendations of the 2014 Joseph Hensley Park Improvement Plan as amended in 2021. Last month the City completed excavation of the upper and lower field areas and installation of two of the four site stormwater management basins. In April, the City plans to complete excavation operations at the upper and lower sports fields and begin installation of site fence and irrigation system.

k Project Description This project will implement improvements to maximize the park's use based on community input and environmental factors. The project is based on the 2014 Citywide Park Plan for Holmes Run Park.

Current Progress

The internal project kick off was held in March to verify the project schedule and confirm what consultant services are needed in the planning phase. Objectives and deliverables were identified for each consultant service needed. Scopes of work will be drafted in the next quarter and solicitations will begin for the necessary services.

| | Q1 | | | | | | | | | | | | | | | | | | | | | Q1 Q2 Q3 Q4 Q1 Q2 Q3 Q4 <td< td=""></td<> |

Explanation of Schedule Variance

Project is progressing within schedule.

| | | Cost M | etrics | | |
|-----------------------|---------------|---------------------|---------------|---------------------------|---------------|
| Plann | ing | Desi | gn | Constructio | on |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent | Construction Phase Budget | Percent Spent |
| \$0.00 | 0% | \$247,293.00 | 63% | \$963,407.00 | 0% |
| Actual Costs: | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress |
| \$0.00 | 100% | \$156,419.24 | 86.48% | \$0.00 | 0.00% |

Explanation of Cost Variance

Project will be turned over to Construction phase. The Architect is holding its billing until Construction Administration phase so the cost variance shows work completed but not billed for. The Architect will be providing Construction Administration for the construction phase, so some items will be addressed in the Construction Phase and billed for, and this is causing the variance between actual costs and the work progress.

| PMIS Project # | 23018 | This project includes the addition of new bus parking and storage facility on the west side of the existing DASH |
| Sponsor Department | Transportation & Environmental Services | facility to support up to additional 38 buses in the fleet for increased service levels in key development areas and due to ambient growth This is the first phase of this project and includes an open canopy structure for additional fleet storage and future electric vehicle charging. The project also includes provisions to |
| Managing Department | General Services | accommodate an electrical equipment distribution yard which is needed to charge the current and future battery |
| Current Phase | Planning | electric DASH fleet in support of its goal to transition to 100% zero emissions. |
| Project Status | Active | |

Current Progress

The City is soliciting Request For Proposals (RFP) from three shortlisted firms selected by the SAC in February 2024. Following the discussions with shortlisted firms, the current project budget is insufficient to complete the entire project, this is primarily due to unforeseen site condition and scope increase required by DASH's VTLP Insurance Group to limit the potential loss of a single thermal event. In response to this requirement, additional fire separations are required to be built inside the structure to separate the buses into maximum of 8 buses in one shared interior storage space. The project team is working to define a reduced base scope and identify alternates to continue the RFP process. The Design-Build contract is expected to be awarded in summer 2024.

| \$246,834.60 | 100% | \$0.00 | 2.08% | \$0.00 | 0.00% |

Explanation of Cost Variance

The cost variance is due to the fact that the total cost for the planning phase includes ongoing services that extend into the design phase, which is yet to commence. Specifically, the consultant's fee for planning encompass continuous involvement in the subsequent design phase.

Project Progress Report

| Project Name | Duke St and Rt 1 Intersection | Project Description |
|---------------------|--|---|
| PMIS Project # | Safety Improvements 23077 | The purpose of this project is to improve safety for all roadway users at two intersections: Duke Street & South Henry Street, and Duke Street & South Patrick Street. These intersections were identified as high crash |
| Sponsor Department | Transportation & Environmental Services | locations in the Vision Zero Action Plan. The concepts will be developed based on intersection safety analysis and informed by community feedback. The project will be phased as short term solutions can be implemented prior to the full build of permanent infrastructure. |
| Managing Department | Project Implementation | |
| Current Phase | Planning | |
| Proiect Status | Active | |

Current Progress

In FY 2024, staff was awarded a grant from the Metropolitan Washington Council of Governments to conduct safety audits and develop design concepts. City staff led multiple community comment periods to gather input on the intersection designs. Recommended improvements that were endorsed by the Traffic & Parking Board at its March 2024 Public Hearing included curb extensions, median islands, slip lane modifications, lighting improvements, leading pedestrian intervals, and No Turn on Red restrictions.

Staff is currently evaluating funding for design and construction of these improvements.

| | | | | | | S | che | edu | ıle | | | | | | | | | | | | |

| Planning - Actual | | | | | | | | | | | | | | | | | | | | | |
| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

The planning phase of this project is largely complete and on schedule. However, design and construction funds will need to be identified to advance the project as planned. Because the design and construction phases are required inputs, the schedule will likely vary based on available funding.

| | | Cost M | etrics | | |
|-----------------------|---------------|---------------------|------------------|---------------------------|---------------|
| Plann | ing | Desi | gn | Constructio | on |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent 0% | Construction Phase Budget | Percent Spent |
| \$0.00 | 0% | \$0.00 | | \$0.00 | 0% |
| Actual Costs: | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress |
| \$0.00 | 62.36% | \$0.00 | 0.00% | \$0.00 | 0.00% |

Explanation of Cost Variance

There is no cost variance. The Planning Phase was funded through a MWCOG technical assistance grant, and the project remained on budget. The City applied for but was not awarded federal Safe Streets and Roads for All funding to design and construct these safety improvements. Staff is applying for Smart Scale funding this fall to fund design and construction. Staff is also identifying some short term measures that could be implemented more quickly.

Communication

Completed Public Communication

03/01/24

Delivery Date

The City published an online feedback form to gather input on the design concepts. Staff presented a recommended preferred alternative to the Traffic & Parking Board at its March Public Hearing. The Board unanimously endorsed the staff-recommended design concept.

The project team will continue to collaborate with the community as needed on potential short-term improvements while longer-term grant funding is sought.

Planned Public Communication

Scheduled Date

Spring 2024

CITY OF ALEXANDRIA **PROJECT MANAGEMENT**

Project Webpage

https://www.alexandriava.gov/transportation-planning/duke-street-and-west-taylor-run-project

Project Progress Report

| Project Name | Duke St and West Taylor Run | Project Description |
|---------------------|--|---|
| | Safety Improvements | This project was a result of the Central Alexandria Traffic Study, which highlighted the goals of reducing cut- |
| PMIS Project # | 20633 | through traffic on neighborhood streets and improving safety at high crash intersections. The project includes |
| Sponsor Department | Transportation & Environmental Services | redesign of the intersection of Duke Street and West Taylor Run Parkway, one of the City's highest crash intersections, by permanently closing off access to Telegraph Road from West Taylor Run Parkway, installing new traffic signal equipment, and providing new pedestrian crossing improvements. The project includes a new |
| Managing Department | Project Implementation | left turn lane for eastbound Duke Street onto the Telegraph Road ramp with westbound Duke Street, modifying |
| Current Phase | Planning | this intersection to improve safety and increase access. |
| Project Status | Active | |

Current Progress

This project is currently in the Planning Phase, advancing toward design. Key elements of the project have been finalized and were approved as part of the Duke Street Transitway concept design. These elements include the permanent closure of access from West Taylor Run Parkway to the Telegraph Road ramp, eastbound Duke Street access, and the addition of left turn access from eastbound Duke Street onto the Telegraph Road ramp. The project team is continuing to work closely with VDOT to obtain the necessary permits and approvals to advance the design concept and avoid unnecessary traffic studies.

The project team continued to collaborate with community leaders and residents to respond to previous comments regarding concepts for the service road east of West Taylor Run Parkway.

| Project Status | Active |
| | |

Project Description The E. Glebe Road and Route 1 intersection improvement project consists of constructing an exclusive left-turn lane, through lane, and right-turn lane in the eastbound direction, and enhancements to assist safe vulnerable user crossing.

Current Progress

Staff has initiated this project through the new project management system. More details and updates will be available as the project moves into the Planning Phase. Staff will coordinate with VDOT in FY 2025 to obtain necessary approvals to advance the project.

During City's communication regarding the potential Entertainment District, the City mentioned this project as an improvement to the existing network that would help improve travel for the projected trips.

| Sponsor Department | Transportation & Environmental Services | sidewalk infrastructure in and around the King Street Metro Station within the enlarged area of right-of-way. This project is intended to enhance mobility, access and safety and comfort for pedestrians, cyclists, vehicular traffic and public transportation in and around the King Street Metro Station. |
| Managing Department | Project Implementation | |
| Current Phase | Planning | |
| Project Status | Active | |

Current Progress

A summary of the online feedback form was posted on the project website in February 2024 to share an overview of community-identified priorities and opportunities for the project area. Incorporating community feedback, staff have begun hiring a consultant to develop concept plans for the King & Commonwealth Streetscape Improvements Project that can be integrated with known nearby projects and inclusive of community feedback. City Staff are continuing to monitor known adjacent projects and awaiting final design plans from Virginia Passenger Rail Authority (VPRA) and Virginia Railway Express (VRE) to ensure alignment with City projects. Staff will continue to seek opportunities to align project scopes and minimize disturbances to surrounding communities.

Staff are working to identify project funding so more detailed design can begin.

| Current Phase | Planning | |
| Proiect Status | Active | |

Current Progress

In the new year, Staff worked with the Consultant team to develop three concept alternatives for the project area, based on previous community feedback and transportation best practices. In February 2024, Staff hosted a community open house to share information on the three corridor alternatives, community feedback, and next steps. A recording of the presentation was posted on the project website and an online feedback form was hosted from mid-February to the end of March to solicit direct feedback on the options. Staff also presented at four Community Association meetings to continue promoting the designs and answering community questions. Staff will begin to review community feedback and identify a preferred alternative for the corridor design. A community meeting is planned for May to present the preferred alternative and interim safety improvements.

CITY OF ALEXANDRIA PROJECT MANAGEMENT

Project Webpage

https://www.alexandriava.gov/capital-projects/project/king-beauregard-intersection-improvements-project

Project Progress Report

| Project Name | King Beauregard Intersection Improvement - Phase II |
|---------------------|--|
| PMIS Project # | 20348 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Construction |
| Project Status | Active |

This project will redesign the King Street and North Beauregard intersection to improve safety for roadway users. The reconfiguration of the roadway will include new turn lanes, median islands, upgraded sidewalks and enhanced crossings. While the project was originally intended to only enhance capacity for vehicles, the design now includes multimodal safety enhancements for various roadway users, to include people walking, biking, driving, and riding transit.

Project Description

Current Progress

The project has progressed to the construction phase. Solicitation of construction services has been delayed as a result of the expiration of construction easement agreements acquired during Phase I. The process to renew the temporary construction easements is underway and anticipated to be completed this Spring. Staff have been coordinating with the applicable owners in effort to obtain these easements free of charge via donation and waiver of valuation/compensation. The Consultant will begin revising the design along the Arlington Condo parcel to eliminate the need to acquire costly temporary construction easements in this section of the project. This design work is anticipated to be completed this Spring. Once this work is completed staff will begin the process of securing VDOT approval, which will allow the City to begin the construction services solicitation process. Active field construction activities are currently scheduled to begin in Spring 2025.

| | | | | | | | S | cho | ed | ul | е | | | | | | | | | | | |

| Planning - Current Baseline | | | | | | | | | | | | | | | | | | | | | | |
| Planning - Actual | | | | | | | | | | | | | | | | | | | | | | |
| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

The overall project is substantially behind schedule. It was delayed to avoid interference with the adjacent commercial development. Current Phase was delayed in 2023, when VDOT requested additional traffic analysis and updated right of way easements to be completed before advertising for construction. Staff worked with VDOT on a process to renewal the temp easement agreements and to update the traffic counts. Staff identified the need for redesign along the Arlington Condo parcel to remove the need to renew costly temporary easements. These redesign once the change order is issues is anticipated to take six weeks to complete.

| | | Cost M | etrics | | | | | | | |
|---------------------------------|-----------------------|-------------------------------|-----------------------|---|------------------------|--|--|--|--|--|
| Plann | ing | Desi | gn | Construction | | | | | | |
| Planning Phase Budget \$0.00 | Percent Spent 0% | Design Phase Budget \$0.00 | Percent Spent 0% | Construction Phase Budget \$8,783,579.85 | Percent Spent 0% | | | | | |
| Actual Costs \$0.00 | Work Progress 100% | Actual Costs \$0.00 | Work Progress 100% | Actual Costs \$0.00 | Work Progress 7.44% | | | | | |

Explanation of Cost Variance

With the updated design of the intersection (reduced scope of the project along the Arlington Condo parcel), the project is anticipated to fall within the current budget. The Construction contract has not been executed yet. As a result of the City's recent transition to a new project management system, in-progress projects do not have cost data displayed for previously completed phases. Please see the Capital Funds Summary for CIP funding and cost data.

| Communication | | | | | | | | | | |

Current Progress

This project is currently awaiting approval from VDOT for the Operational and Safety Analysis Report (OSAR). VDOT provided initial comments for the City's draft submission in November, 2022. Staff responded to VDOT's comments and resubmitted the proposed design concept for VDOT's final review and approval of the OSAR on April 4, 2024. In parallel, the City's design consultant developed and submitted 30% design for review by the City and VDOT. Staff continues to actively communicate / coordinate with VDOT and the adjacent developer to foster project advancement in order to achieve all project milestone dates.

Explanation of Cost Variance

Delayed invoicing from the contractor resulted in cost variance.

Communication

Completed Public Communication

Delivery Date Spring 2024

Planned Public Communication

As the project moves forward, the project team will keep the community informed with relevant information. The communications will largely focus on impacts to people using Duke Street while the project is under construction.

Scheduled Date

Summer 2024

Communication during this phase has been largely between the City and VDOT. Both parties have worked together to navigate processes in order to advance the project. Additionally, coordination between the City, Landmark Mall developers, Foulger Pratt, and INOVA design team has bene ongoing.

Project Progress Report

| Project Name | Landmark Mall Transit Center | Project Description |
|---------------------|--|--|
| PMIS Project # | Development 23068 | This project will design and construct a new Transit Center at the redeveloped Landmark Mall site. The transit center will include six new bus bays, additional transit amenities, and create a multimodal hub for people using |
| Sponsor Department | Transportation & Environmental Services | the site. The project was included in the West End development plan, and both the West End and Duke Street transitways, along with other routes, would utilize this transit center. |
| Managing Department | Project Implementation | |
| Current Phase | Planning | |
| Project Status | Active | |

Current Progress

A proposal for architectural design services was completed and is with procurement to be posted for an open procurement process. Once a qualified design firm has been identified for the design of the Transit Center, a project timeline and engagement schedule will be developed and shared with the community.

The City was notified of a grant award to fund temporary bus shelters at Landmark until the full Transit Center can be constructed.

Explanation of Cost Variance

Spending is consistent with the plan. A revised cost estimate will be established once a consultant is procured.

Communication

Completed Public Communication

Delivery Date Winter 2024

Staff notified the DASH Board that a grant as awarded to provide interim transit shelters at the Landmark site until the full Transit Center can be constructed.

A quarterly update to the Eisenhower West/Landmark Van Dorn Implementation Group is planned. Once a design team is hired, staff will determine and meet with the key stakeholder groups that will receive an overview of the project schedule and upcoming opportunities to provide input.

Planned Public Communication

Scheduled Date

Summer 2024

PROJECT MANAGEMENT

Project Webpage

https://www.alexandriava.gov/transportation-planning/project/mount-vernon-trail-improvements-at-east-abingdon-drive

Project Progress Report

| Project Name | Mt. Vernon Trail at E Abingdon Dr Improvements |
|---------------------|---|
| PMIS Project # | 20180 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |
| | |

This project will improve pedestrian & bicycle safety along the Mount Vernon Trail at East Abingdon Drive and at Slaters Lane by providing an enhanced, wider pathway that also separates trail users from transit riders at the bus stop.

Project Description

Current Progress

The design efforts were paused as the City worked with the adjacent Potomac River Generating Station (PRGS) redevelopment and Virginia Department of Transportation (VDOT) to rescope the proposed improvements along Slater's Lane and East Abingdon Drive. With a revised scope, the design resumed in late January 2024. The 90% design plans are expected to be submitted in mid-April.

Project Progress Report

Project NameOld Cameron Run Trail -
Hooffs Run Dr to S Payne StPMIS Project #20410Sponsor DepartmentTransportation &
Environmental ServicesManaging DepartmentProject ImplementationCurrent PhaseDesignProject StatusActive

This project will construct a 0.53 mile shared-use path between Hooffs Run Drive and South Payne Street (the existing shared-use path between Hooffs Run waterway and South Payne Street will be repaved). The project is highlighted in the Alexandria Mobility Plan as a vital trail connection and in the Eisenhower East Small Area Plan.

Project Description

Current Progress

The project design continued. The 90% design submission to VDOT and the City is anticipated by May 2024.

The Consultant started working on the required AlexRenew easement plats. As the plats and deeds are developed, staff will continue to coordinate with AlexRenew. Construction of the trail cannot begin until after AlexRenew's tunnel project is completed (completion is currently scheduled for some time in 2026). Staff will continue to work with AlexRenew to identify any opportunities to begin construction prior to 2026, once the design is completed and VDOT approval is obtained.

CITY OF ALEXANDRIA **PROJECT MANAGEMENT**

Project Webpage

https://www.alexandriava.gov/capital-projects/project/seminary-and-beauregard-intersection-improvement-project

Project Progress Report

Project Name

| Project Name | Seminary and Beauregard Intersection Improvements |
|---------------------|---|
| PMIS Project # | 20444 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Planning |
| Project Status | Active |
| | |

The purpose of this project is to reconfigure the intersection of Seminary Road and North Beauregard Street to improve safety for all roadway users and enhance multimodal access through this area. The current design concept is dependent on modifications to the I-395 ramp configuration and access through Southern Towers.

Project Description

Current Progress

Through analysis, staff determined potential concept designs for the intersection, along with the originally approved Ellipse. Several concepts were considered to see how they impacted intersection safety, impacts to transit facilities and routes, and comfort level for pedestrian and bicycle users. The project team also considered cost and constructability of the various concepts. The concept of a compact intersection seem to address the concerns of the community, continue to move traffic, and could be constructed with a phased approach. This concept was shared with the community through the Alex West effort. The proposed design is dependent on modifications to the I-395 ramps on and off at Seminary Road. Staff is working with the state to determine the next steps in advancing projects that would allow this project to move forward. Staff does have funds from the Safe Streets for All (SS4A) grant that will evaluate the Seminary Road section between Beauregard Street and Library Lane. The intention is to perform a evaluation of the corridor and develop alternatives and recommendations. Since the I-395 interchange is a primary issue for congestion and safety, staff is working with VDOT on scoping the appropriate documentation that will be required as part of the SS4A scope. Finally, since the scale of the effort will require additional resources to develop an accepted interchange plan for VDOT and the FHWA, staff did pursue and apply for a federal RAISE grant with the assistance of the help of Metropolitan Washington Council of Government (MWCOG) and VDOT. This grant will complete the necessary steps to pursue approvals for modifications to the interchange and its influence area. This includes analyzing, concepting, designing, and finalizing any advanced recommendations on Seminary Road and the interchange.

| | | | | | | S | Sch | ed | ule |) | | | | | | | | | | | | |
|---------------------------------|----|-------------|------|-----------|----|----|--------------|----|------|-----------|-------|------------|------|---------------|----|----|-----------|------|--------------|----|----|--------------|

| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

Slight adjustments to the schedule are necessary due to coordination with the Alex West Small Area Plan engagement and analysis efforts.

| | | Cost M | etrics | | |
|-----------------------|---------------|---------------------|------------------|---------------------------|---------------|
| Plann | ing | Desi | gn | Constructio | on |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent 0% | Construction Phase Budget | Percent Spent |
| \$349,979.89 | 77% | \$0.00 | | \$0.00 | 0% |
| Actual Costs | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress |
| \$270,900.75 | 0.00% | \$0.00 | 0.00% | \$0.00 | 0.00% |

Explanation of Cost Variance

There were no changes in the cost at this time. Due to the changing concept designs, cost is within the original budget as noted in the CIP but has not been formally estimated at this time.

Completed Public Communication

Staff met with Seminary West community leaders in March. Topics included this intersection and the interchange, the Alex West traffic study, progress efforts on Seminary West, and planning efforts I-395 Interchange. Staff attended the Transportation Commission and City Council to support a planning grant that will inform the interchange and lane configuration to the intersection.

Communication

Delivery Date

03/20/24

Planned Public Communication Staff will be at the Alex West April 23rd meeting to speak on items

related to transportation in the plan but also the Seminary Beauregard Intersection.

Scheduled Date

Spring 2024

Project Progress Report

| Project Name | William Ramsay SRTS |
|---------------------|--|
| PMIS Project # | 23039 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |
| | |

This project was identified through the Safe Routes to School walk audits in 2017. The project will enhance safety and access for students walking or biking to William Ramsay Elementary School and Recreation Center by providing safer roadway crossings and sidewalks. The project is supported by the goals of the Alexandria Mobility Plan, Complete Streets Design Guidelines, and Vision Zero Policy.

Project Description

Current Progress

The scope of this project includes crosswalk improvements across Sanger Avenue and North Beauregard Street, and a new sidewalk along Sanger Avenue. The infrastructure improvements in this project will continue to enhance safety and support the goals of increasing safe access for people to walk, bike and take transit to access this area. The project is being designed and constructed with on-call contractors to expedite the project delivery. The design of this project is underway. The 30% design plan review comments were provided to the Consultant this quarter. The Consultant is incorporating design revisions based on these comments while advancing the design to 60%. The project continues to be coordinated with the West End Transitway project (to be constructed in 2026) and the resurfacing of Sanger Avenue, which is scheduled for 2024. Staff will brief the Traffic and Parking Board on the project when 60% design plans are received.

This project provides for the removal and stabilization of Robinson Terminal North pier (by RTN), sampling and characterization of the riverbed sediments under the pier, evaluation of remedial alternatives for contaminated sediments, and implementation (design and construction) related to remediation of contaminated sediments. This project is a component of the Consent Decree with the Potomac Riverkeeper, which became effective January 9, 2024.

Project Description

Current Progress

The City and the owner of Robinson Terminal North (RTN) have executed an agreement that requires RTN's owner to remove unstable portions of the pier, along with removal of debris. The City has requested a scope of work from its technical consultant to prepare a summary of various remedial alternatives for containment and remediation of sediments under and adjacent to the pier, including cost, effectiveness and ease of implementation. This project is part of a comprehensive remediation program and is a component of the Oronoco Outfall Consent Decree, which was executed January 9, 2024.

This project will provide enhanced safety upgrades to sidewalks and streets around the redeveloped Landmark Mall site. The project is intended to create a safer and more multimodal environment for people who want and need to access the new West End Transit Center which will be serviced by both the Duke Street and West End Transitway.

Project Description

Current Progress

The cost estimate was completed and a project cost estimate was determined to be approximately \$6.8M for design and construction. The City has finalized the agreement between the City and VDOT to mange and proceed with this project. The City has received authorization from VDOT to move into the Design Phase. We plan to use a design consultant through the Department of Project Implementation's (DPI's) Engineer On Record (EOR) Contract. We are anticipating to award the design consultant contract in early 2025.

| Schedule | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|----|--|-----------|----|----|--|--------------|------|----|--|-----------|----|----|-----------|----|----|----------|----|----|-----------|---|----|----|--------------|------|------|----|----|--|

CITY OF ALEXANDRIA **PROJECT MANAGEMENT**

Project Webpage

https://www.alexandriava.gov/transportation-planning/mount-vernon-avenue-north-complete-streets#ProjectBackground

Project Progress Report

| Project Name | Mount Vernon Ave North Traffic | Project Description |
|---------------------|--|--|
| | Safety Improvements | The purpose of this project is to design and construct safety, mobility, and access improvements on Mount |
| PMIS Project # | 20656 | Vernon Avenue between Glebe Road and Four Mile Run. This project will address multiple safety challenges, |
| Sponsor Department | Transportation & Environmental Services | including a high crash history, complicated intersections, and frequent, uncontrolled pedestrian crossings in a high-activity area for Arlandria residents. Elements of the project may include intersection improvements, bus stop upgrades, enhanced sidewalks and pedestrian crossings, bicycle facilities, and on-street parking |
| Managing Department | Project Implementation | throughout the corridor. |
| Current Phase | Planning | |
| Proiect Status | Active | |

Current Progress

The project team reviewed the community input on the concept designs and used that input, along with design best practices, to select the preferred alternative for these intersections. Staff has identified additional funding needed in order to fully fund the project. Over the past quarter, staff worked closely with property owners to discuss the concept designs and understand challenges with the right-of-way for the various concepts. The project team finalized review of traffic, pedestrian safety, and right-of-way analysis needed to bring forth preferred concepts to the Traffic and Parking Board for a public hearing.

The project team continued to coordinate with key stakeholders, including property owners, as concept designs progressed. In 2023, the community provided input on the design options that were developed based on feedback related to issues along the corridor.

| | Schedule | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|---------------|----|--|--------------|----|--|--------------|----|----|--------------|--|----|--------------|----|-----------|------|-----------|-----|--------------|----|----|-------------|--|
| Phase | 2021 Q2 Q3 | Q4 | | 2022 2 Q3 | Q4 | | 2023 2 Q3 | Q4 | Q1 | 2024 Q2 Q | | Q1 | 2025 Q2 C | Q1 | 202 Q2 | 4 Q1 | 202 Q2 | 4 C | 2028 2 Q3 | Q4 | Q1 | 202 Q2 (| |
| Planning - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | |
| Planning - Actual | | | | | | | | | | | | | | | | | | | | | | | |
| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

The project is on schedule and is expected to conclude the Planning Phase in mid-2024 and move into the design phase.

| | | Cost M | etrics | | |
|-----------------------|---------------|---------------------|---------------|---------------------------|---------------|
| Plann | ing | Desi | gn | Constructio | on |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent | Construction Phase Budget | Percent Spent |
| \$65,000.00 | 100% | \$564,136.00 | 0% | \$3,975,437.00 | 0% |
| Actual Costs: | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress |
| \$65,000.00 | 96.76% | \$0.00 | 0.00% | \$0.00 | 0.00% |

Explanation of Cost Variance

The project is currently on-budget. The budget for the planning phase is expended, and all remaining planning tasks will be performed in-house at no additional cost. Additional funds were added to this project to fully fund design, right-of-way, and construction.

Communication

Completed Public Communication

for the project.

Delivery Date Winter 2024

The project team announced the preferred alternatives for each intersection via eNews and social media. Staff also worked with adjacent property owners on letters of support

The project team is expected to present the preferred alternatives at a Traffic and Parking Board Public Hearing. If the Board approves the staff recommendations, the project will advance to

Planned Public Communication

Scheduled Date

Spring 2024

design. The community will be notified via eNews about the public hearing

PROJECT MANAGEMENT

Project Webpage

https://www.alexandriava.gov/transportation-planning/beauregardstreet-multi-use-trail-project

Project Progress Report

| Project Name | Van Dorn - Beauregard Bicycle | Project Description |
|---------------------|--|---|
| PMIS Project # | Facilities 23065 | This project proposes to convert an existing sidewalk to a 10' shared use trail along North Beauregard Street from Fillmore Avenue to Berkeley Street. The project will increase multimodal access along the Alex West |
| Sponsor Department | Transportation & Environmental Services | planning area and provide connections to Capital Bikeshare stations and future Bus Rapid Transit stations. This section has been identified as a high-crash corridor in the Vision Zero Action Plan. |
| Managing Department | Project Implementation | |
| Current Phase | Design | |
| Project Status | Active | |

Current Progress

Project design is progressing towards 100% completion. All 90% submission comments from the City and VDOT are being addressed by the design team. City staff continues to coordinate the adjacent property easement and right of way dedication process. The design team anticipates meeting with Dominion this spring to determine requirements for the adjacent street lights which will allow for the plans to be finalized.

The start of active construction is dependent on the adjacent development's completion of their electrical duct bank installation, which is currently not scheduled.

The project website is in place. Staff conducted an outreach survey for the project in Winter 2022, which influenced the design that is being finalized. The project was highlighted through the Alex West Planning project at multiple community meetings in Fall 2023.

| Schedule | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| \$0.00 | 0% | \$469,165.39 | 62% | | 0% | | | | | | | | |
| Actual Costs: | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress | | | | | | | | |
| \$0.00 | 100% | \$290,461.31 | 90.20% | \$0.00 | 0.00% | | | | | | | | |

Explanation of Cost Variance

Spending is consistent with the plan.

Communication

Completed Public Communication

Fall 2023

Delivery Date

Planned Public Communication

Provide information to the community through the Alex West Planning process and proposed recommendations for the updated Small Area Plan. As designs are finalized and construction timelines are determined, staff will provide updates to the community.

Scheduled Date

Summer 2024

Project website is in place. Staff conducted a outreach survey for the project in winter 2022, the results of this survey influenced the design which is now being finalized. The project was highlight through the Alex West Planning project at multiple community meetings in Fall 2023.

47

CITY OF ALEXANDRIA PROJECT MANAGEMENT

Project Webpage

https://www.alexandriava.gov/transportation-planning/project/high-crash-intersection-safety-audits

Project Progress Report

| Project Name | West End High Crash Intersection Improvements |
|---------------------|--|
| PMIS Project # | 23033 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Planning |
| Project Status | Active |
| | |

This initiative aims to assess seven high-crash intersections in the West End through safety audits involving key stakeholders. It will also devise conceptual designs, in coordination with the community, to enhance safety for all users of these roadways.

Project Description

Current Progress

Staff submitted a RAISE grant to fund additional design and analysis work to complement this project. Staff also continued coordinating with the Virginia Department of Transportation on establishing a project framework, which is required due to the proximity of the project to the interstate highway system. Staff continued to share project information with community stakeholders through the Alex West Small Area Plan process and other engagement opportunities.

Staff was notified that the grant applications submitted for \$3 million in design funding was recommended for award. The public comment period is open and the final proposed awards will be approved in June 2024.

| | | | | | | So | che | du | ıle | | | | | | | | | | | | | |

Project Description

Current Progress

Staff held a pre-construction meeting on March 7. The Notice to Proceed (NTP) for the construction was issued for April 1, 2024. Staff held an open house on April 4 to provide information about the upcoming construction activities and to address any questions or concerns. Construction began with the Contractor submitting submittals and erecting the Variable Message Signs (VMSs) to inform drivers of pending bridge construction and to expect delays. Active construction is anticipated to begin in April 2024.

Project Description

This project consist of performing preventive and restorative maintenance and repairs activities to prevent further deterioration of the culvert and extending the structure's service life.

Current Progress

All required repairs were achieved and the project reached the substantial completion milestone in early March. The substantial completion letter was issued to the Contractor on March 8. The Contractor addressed all the punch list items and staff began the project close out process. This project will be closed out by late April.

In response to repeated sewer backups at several residences along the 400 block of Wolfe Street, a recent back up and preliminary sewer investigation has prompted the planning, design and construction of an upsized sewer network along the 400 block of Wolfe St in the Old Town combined sewershed.

Project Description

Current Progress

The 400 Block of Wolfe Street Sewer Upsizing Project completed the planning phase and entered the design phase during first quarter of 2024. During the planning phase, staff met with affected residents of repeated localized sewer backups in the project area. After preliminary investigation, it was determined that further field investigations and design would be necessary to pursue upsizing the main sewer along the 400 Block of Wolfe Street to help address sewer backups and localized flooding. During the design phase thus far, procurement of field assessment vendors has been completed and project area field investigations are ongoing. Project management activities are also underway including monitoring project schedule, work progress, vendor performance, permit tracking and risk management.

Project Description

This project removes and replaces the existing sanitary sewer within the 500 block of Lee Street. As a result of root intrusion (roots growing into the pipe via cracks), sewage occasionally backs up into several of the properties. Regular maintenance will be performed (cleaning) until the pipe is replaced.

Current Progress

The 60% design has been submitted for review and comments were provided to the Consultant on April 8, 2024. The Consultant will begin addressing the comments and developing the 90% design.

This project is a sewer separation project at 600 Block of N Columbus Street where the sanitary sewer is being disconnected from the combined sewer system and reconnected to a fully separated sanitary sewer. This project is being undertaken to mitigate the potential for sewer basement backups from the combined sewer being over capacity during periods of significant wet weather.

Project Description

Current Progress

Utility locating and geotechnical borings were completed. A 60% design for the sewer separation is in progress and is anticipated to be completed by mid May, 2024.

| | |

Project Description

This project provides for the inspection and rehabilitation of City-owned lateral sewers in the Del Ray neighborhood, generally west of Commonwealth Avenue and east of Russell Road. This work is being done as part of the City's Sanitary Sewer Asset Renewal Program.

Current Progress

CCTV of City-owned portions of lateral sewers have been completed. City staff is currently reviewing the inspection data to determine what lateral sewers require rehabilitation. At the end of the planning phase, a summary report will be issued that include the results of the inspections, pipes requiring rehabilitation and planning level costs for the design and construction phases of the project.

| Schedule | | | | | | | | | | | | | | | | | |

Project Description This project provides for the inspection and rehabilitation of mainline sanitary sewers and manholes in the Del Ray neighborhood, generally west of Commonwealth Avenue and east of Russell Road. This work is being done as part of the City's Sanitary Sewer Asset Renewal Program.

Current Progress

The field work has been completed, which included manhole inspections and CCTV inspections of public sewer mains. City staff is currently reviewing the inspection data to determine what sewer pipes and manholes require rehabilitation. A summary of the inspection results and rehabilitation recommendations will be finalized into a report.

City to install 870 manhole inserts in the Four Mile Run, Commonwealth, and Taylor Run sanitary sewersheds in order to prevent stormwater runoff from entering sanitary sewer manholes during wet weather. This project is being undertaken to reduce the impact of stormwater runoff into the sanitary sewer system, which can lead to sewer backups during periods of wet weather.

Project Description

Current Progress

Construction contract awarded and preconstruction meeting was held on January 18, 2024. Notice to Proceed was given to the Contractor January 29, 2024. A total of 758 out of 870 manhole inserts have been installed. It is anticipated that the installation of manhole inserts will be completed by June 2024.

The purpose of this project is to mitigate flooding in the Nethergate Townhome community based on reports from residents after intense rainfall events. The project area is bound by Bashford Ln to the north, Second St. to the south, Portner Rd to the west and W Abingdon Dr to the east. As part of this project, the design team will analyze hydraulic capacity of the existing storm sewer, and develop alternatives to mitigate flooding.

Project Description

Current Progress

Field survey of project limits completed and sent to City on 2/26, which included mapping of existing site topography, roadway features, utility locations, and storm sewer structure locations and invert elevations. Alternatives analysis completed by design consultant and sent to the City on 2/26. Dye testing and additional CCTV investigations will be performed next period to help determine elevation and direction of sump pump discharge laterals. This is to ensure that project will be successful in eliminating basement backups through sump pump laterals during 10-year design storm event.

Project Progress Report

Project NameNorth Ridge Area Sanitary
Sewer RehabilitationPMIS Project #23021Sponsor DepartmentTransportation &
Environmental ServicesManaging DepartmentProject ImplementationCurrent PhasePlanningProject StatusActive

The intent of this project is to inspect the sewers, manholes, and laterals in the North Ridge neighborhood as part of the Sanitary Sewer Asset Renewal Program. The goal of the program is to preserve and protect existing City-owned sewer infrastructure, extend its useful life, and protect against pipe collapses and other emergency repairs. In addition, each project will help to reduce the amount of infiltration and inflow (I&I) into the sanitary sewer system.

Project Description

Current Progress

The North Ridge Area Sanitary Sewer Rehabilitation Project is currently in the planning phase. Under this task order sanitary sewers, manholes and City-owned laterals are inspected by City consultants to record the structural integrity and maintenance status. At the end March 2024, the following inspections were completed: 63,201 linear feet of sewer, 975 sewer laterals, and 312 manholes. This amounts to approximately 98% of mainline sewers, 70% of sewer laterals, and 99% of sewer manholes planned for inspection under this project.

Project Progress Report

| Project Name | Pitt and Gibbon Combined Sewer Surcharging Mitigation |
|---------------------|--|
| PMIS Project # | 23025 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Planning |
| Project Status | Active |

Mitigate private property overland flooding occurring during high intensity rainfall events that cause combined sewer manhole surcharging near the intersection of South Pitt and Gibbon Streets. Project solutions developed and implemented shall meet the City's design standards for a 10-year storm.

Project Description

Current Progress

Field survey and alternatives analysis progressed last quarter. City reviewed draft survey and requested additional field data. Technical memorandum for current preferred alternative completed. After review of current alternative, City is requesting additional investigation to improve achieved level of service for the 10-year design storm. Current alternative provides significant improvement from existing conditions, but is nearly overtopping for the 10-year design storm at the Pitt and Gibbon intersection.

 $\label{eq:https://www.alexandriava.gov/transportation-planning/adaptive-traffic-signal-control$

Project Progress Report

| Project Name | Adaptive Signal Control Phase | Project Description |
|---------------------|---|---|
| | I & Eisenhower Broadband Communications Link | The Adaptive Signal Control Phase 1 project will install detection and management systems to respond to unpredictable traffic conditions. Detection systems use video and LiDAR to identify real-time travel conditions. |
| PMIS Project # | 23040 | and management systems use that information to optimize signal timing throughout an entire corridor. This |
| Sponsor Department | Transportation & Environmental Services | project empowers Alexandria to reduce congestion and increase trip reliability even when irregular events, like weather patterns or large events, disrupt traffic flow. The Broadband Communications Link project installs fiber optic communication along Eisenhower avenue, between Van Dorn Street and Clermont Avenue. This |
| Managing Department | Project Implementation | broadband will allow Alexandria to better synchronize traffic signals on this corridor, install new CCTV cameras, and implement future smart mobility projects. The Adaptive Phase 1 project and Broadband project are being |
| Current Phase | Construction | combined and will be completed together. |
| Project Status | Active | |

Current Progress

The design for this project is complete. Staff has provided the draft Adaptive Phase 1/Broadband Link Invitation to Bid (ITB) for construction services to VDOT for review. The ITB is expected to be released in early summer 2024, and construction is expected to begin by the end of 2024. Construction duration is approximately two years.

Staff continues to inform the community about the Smart Mobility Program and projects within it at Board, Commission and community meetings.

Project Progress Report

Project Name ITS PMIS Project # 230 Sponsor Department Trait Env Managing Department Project

Current Phase Project Status ITS Integration - Phase III 23000 Transportation & Environmental Services Project Implementation Construction

Active

This project is proposing installation of new conduit, fiber optic cable, and required equipment to provide a broadband communication network to traffic signals and future technologies using Passive Optical Network (PON) technology. This project lays the groundwork for future intelligent transportation projects like adaptive signal control, pedestrian safety analyses, and a full Transportation Management Center (TMC). This is a multiphase project, and Phase III is focusing on Duke Street, Van Dorn Street, King Street and North Beauregard Street

Project Description

Current Progress

Active construction continued throughout the City (Van Dorn Street, King Street (west of Old Town), and Seminary Road). There are ongoing conversations with the Contractor's leadership regarding the required measures from their staff to keep this project progressing and to achieve the contract requirements. As a result of coordination issues with the reduced progressing with the Contractor on a recovery schedule.

Project Progress Report

Project Name ITS Phase IV PMIS Project # 23067 Sponsor Department Transportation & Environmental Services Managing Department Project Implementation Current Phase Construction Project Status Active

Project Description This project is the 4th phase of a multi-phase project to lay the groundwork for Smart Mobility infrastructure. This project will build on the City's existing traffic network and install additional conduit, fiber optic cable, CCTV cameras. This infrastructure will expand the broadband communication network to traffic signals and enable rapid information exchange for future technologies.

Current Progress

Staff is finalizing the City's Invitation to Bid (ITB) review and preparing the submission package for VDOT's review. Once VDOT has finalized their review, the City will release the ITB (anticipated this quarter). Construction is scheduled to begin this Fall.

The Smart Mobility Program was presented to the Transportation Commission in November 2023 and the IT Commission in March 2024. The ITS website was updated and provides a more public friendly explanation of the project. Staff presented the program at the Smart Cities Connect National Conference in November 2023.

 $\label{eq:https://www.alexandriava.gov/transportation-planning/adaptive-traffic-signal-control$

Project Progress Report

| Project Name | Traffic Adaptive Signal Control | Project Description |
|---------------------|--|--|
| PMIS Project # | 23029 | The Adaptive Traffic Signal project anticipates and addresses the dynamic needs of a growing community, |
| Sponsor Department | Transportation & Environmental Services | setting the stage for a more efficient, technologically advanced, and safe traffic management system in North Potomac Yard. The project will deploy a responsive and synchronized traffic management system, with a particular focus on the Route 1 signalized intersections and the parallel Potomac Avenue signalized |
| Managing Department | Project Implementation | intersections. This deployment incorporates cutting edge video detection devices and a robust high-speed |
| Current Phase | Planning | communications infrastructure that seamlessly integrates signals in North Potomac Yard with neighboring signal zones, including the newly installed adaptive signals along the Duke Street and Van Dorn Street |
| Project Status | Active | corridors. It will also include the installation of modernized cabinets and controllers to enable future traffic control options. This project will create new levers for the City to manage special events and irregular surges in traffic volume, and lays the foundation for predictive signal management and integration with connected and autonomous vehicles. |

Current Progress

The design of this project depends heavily on the construction of the Adaptive Phase 1 project. Adaptive Phase 1 will go out to bid in Summer 2024, at which point staff will further develop the scope of work and specific functionality that will be included in this project, based on lessons learned from Phase 1. It was determined that Phase 2 will be deployed on Route 1.

Communication

Completed Public Communication

Delivery Date Spring 2024

The Smart Mobility Program was presented to the Transportation Commission in November 2023, and to the IT Commission in 2024.

Planned Public Communication

The Transportation Commission will receive written updates on the status of this project and other Smart Mobility projects. Specific updates will be shared on the project website when construction of Phase 1 begins.

Scheduled Date

Summer 2024

PROJECT MANAGEMENT

Project Progress Report

| Project Name | 4300 Block of Loyola Avenue Storm Sewer Upgrade |
|---------------------|--|
| PMIS Project # | 23045 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |
| | |

Project Description This project will replace the existing open storm sewer at 4300 block of Loyola Avenue with an enclosed storm sewer pipe.

Current Progress

The design consultant submitted the final proposal for the design services. Staff evaluated the proposal and provided recommendations as part of negotiation process. Department procurement support team started processing the purchasing requisition for the design services. Anticipate award and start of active design at the end of April 2024.

| | Schedule | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|----------|----------|--|----|----|-----------|--|----|----|--------------|------|--------------|----|----|----------|----|----|----------|----|----|----|----|--|
| Phase | Q1 | 20 Q2 | | Q4 | Q1 | 202 Q2 | | Q4 | Q1 | 2024 Q2 G | 4 Q1 | 2025 2 Q3 | Q4 | Q1 | 20 Q2 | Q4 | Q1 | 20 Q2 | Q4 | Q1 | Q2 | Q3 | |
| Planning - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | |
| Planning - Actual | | | | | | | | | | | | | | | | | | | | | | | |
| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

The procurement process for design services took longer than anticipated. To get the project back on track, staff will work with the design consultant to complete the field assessment activities with greater efficiency.

| Cost Metrics | | | | | | | |
|-----------------------|---------------|----------------------------------|---------------|---------------------------|---------------|--|--|
| Plann | ing | Desi | gn | Constructio | on | | |
| Planning Phase Budget | Percent Spent | Design Phase Budget \$236,500.00 | Percent Spent | Construction Phase Budget | Percent Spent | | |

The project improves the storm sewer system in E Bellefonte Ave & E Howell Ave to mitigate neighborhood flooding from intense rain events.

Project Description

Current Progress

Bellefonte avenue storm drain improvement project planning phase is near completion. The investigation of neighborhood flooding study is now available, which includes site evaluation, CCTV inspection, hydraulic modeling verification, solution development and cost estimates. The project will proceed to design once the project budget is in place.

Project Progress Report

| Project Name | Clifford Ave, Fulton St. & Manning St. (CFM) Storm Sewer Improvements |
|---------------------|---|
| PMIS Project # | 23032 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |
| | |

The Clifford Avenue, Fulton Street and Manning Street (CFM) Storm Sewer Improvements Project will provide flooding mitigation to townhouses along the 3000 block of Fulton Street and Manning Street. The alley bound between the two streets will be re-built to channelize surface flow and improve drainage. Inlets and underground storage will be installed to capture and attenuate stormwater runoff. Utility impacts will be identified and resolved during the design phase.

Project Description

Current Progress

The Clifford Avenue, Fulton Street and Manning Street Storm Sewer Project is currently negotiating design procurement with an on-call contractor. A revised proposal with updated contract rates is anticipated to be received in early May. In tandem with contract negotiations, the City coordinated and completed in-house site survey of the project area to reduce schedule impact and design costs

| | | | | | | | Sc | he | du | le | | | | | |
|---------------------------------|----|-----------|------|----|-------------|-----|----|-------------|----|----|-----------|----|----|----|----|

These storm sewer improvements are a portion of the future Large Capacity Project – Edison and Dale that have been accelerated with Virginia Community Flood Preparedness Fund (CFPF) prior to the funding becoming available in FY 2026. |
| Managing Department | Project Implementation | |
| Current Phase | Design | |
| Project Status | Active | |

Current Progress

Edison St. Drainage Improvement Project is under design and projected to complete Spring 2024. In March of 2024, the City completed review of the 90% plans and issued comments. The City is also in the process of procuring additional geotechnical investigation to confirm the location of various underground utilities. Public notices will be issued prior to mobilization for the geotechnical investigation. Final design is anticipated to be received in May of 2024; however, completion of the design phase is contingent on the completion of the aforementioned geotechnical investigation.

| Schedule | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|----|--|-----------|----|----|--|------------|-----|------|----------|----|----|------|-------------|----|----|----------|----|----|-----|----|
| Phase | Q1 | |)21 Q3 | Q4 | Q1 | | 022 2 Q | 4 (| 21 (| 20 Q2 | Q4 | Q1 | 2024 | 4 Q3 C | 24 | Q1 | 20 Q2 | Q4 | Q1 | 2 0 | 23 |
| Planning - Current Baseline | | | | | | | | | | | | | | | | | | | | | |
| Planning - Actual | | | | | | | | | | | | | | | | | | | | | |
| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

Schedule progress is consistent with plan. Minor delay in receipt of the 90% deliverable, but will still maintain overall completion target.

| | | Cost M | etrics | | |
|-----------------------|---------------|---------------------|---------------|---------------------------|---------------|
| Plann | ing | Desi | gn | Constructio | on |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent | Construction Phase Budget | Percent Spent |
| \$0.00 | 0% | \$180,000.00 | 93% | \$799,000.00 | 0% |
| Actual Costs | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress |
| \$0.00 | 0.00% | \$167,122.52 | 76.50% | \$0.00 | 0.00% |

Explanation of Cost Variance

The shown variance between work completed and expenditure to date is the result of delay in the 90% deliverable, which limited work progress on the final deliverable for this period. The project is forecasted to exceed original design budget due to a necessary geotechnical investigation. Additional program funds are available. As a result of the City's recent transition to a new project management system, in-progress projects do not have cost data displayed for previously completed phases. Please see the Capital Funds Summary for CIP funding and cost data.

|---------------------|---|
| PMIS Project # | 23043 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Construction |
| Project Status | Active |

Project Description This project consists of repairing four blowout locations, installation of access panels to the culvert for future maintenance and replacement of the existing retaining wall behind 67 Commonwealth Ave.

Current Progress

Active construction progressed with the installation of the access hatches, grading, and stabilizing and clearing the project site. The contractor reached substantial completion at the end of March, allowing the sidewalk through the park to be reopened. The project will be closed out by the end of May 2024.

| Current Phase | Design |
| Project Status | Active |

The Hume Avenue Storm Sewer Bypass Project will install storm sewer and inlets along the 100 block of Hume Avenue and E. Raymond Avenue. The addition of a new utility within each right-of-way requires the relocation of gas, electric, water and sanitary systems. On E. Raymond Avenue the sanitary sewer will be upgraded to a larger pipe in tandem with its re-location. Hume Avenue will be re-built to restore conveyance along the curb and gutter.

Project Description

Project Webpage

https://www.alexandriava.gov/tes/hume-avenue-bypass-project

Current Progress

The City completed review of the 90% design plans and issued comments in late February. Additional geotechnical investigation is required to locate subsurface gas lines within the work area. Final design will be completed following the geotechnical investigation. Door hangers will be distributed to residents prior to mobilization for the geotechnical investigation.

This project will improve storm sewer system to mitigate flooding for the future 10-year design storm at two problem areas: the intersection of Commonwealth Ave and Ashby St, and at the intersection of Ashby St and E Glebe Rd

Project Description

Current Progress

Design team continued progress towards the 60% completion milestone deliverables, which are scheduled for 4/25/2024 delivery to the City. Submission will include plans, specifications, basis of design report and an updated cost estimate. Project team has developed a traffic mitigation plan, which highlights major detours and work restrictions during construction. Design team coordinated updated utility crossing alignments with VAWC and Washington Gas and incorporated comments into the 60% planset. Team began planning and developing materials for a public meeting, which is scheduled for 5/22. FEMA BRIC and FMA grant applications have been approved by VDEM and sent to FEMA for review on 2/27/2024. FEMA review is anticipated to last anywhere from 6 to 18 months.

|---------------------|---|
| PMIS Project # | 23061 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |

This project involves stormwater system improvements to reduce flooding along the alignment of the existing Hooffs Run culvert. The improvements may include a combination of storage, large conveyance storm sewers, and green infrastructure to reduce flood risk. The design of these systems will consider the impact of climate change.

Project Description

Current Progress

The design team is currently evaluating potential solutions to manage the 10-year storm for future conditions without worsening flooding in other parts of the watershed. The evaluation includes engineering feasibility, constructability, socioeconomic factors, and development of cost estimates to assess the cost-effectiveness of the potential solutions. Ongoing activities include the review of the topographic survey along Russell Road, and installation of two flow monitoring devices to gather site-specific data for calibration of the hydraulic model used to evaluate performance of the potential solutions.

Project Progress Report

| Project Name | Mt Vernon and Edison Dual Culvert Replacement Project |
|---------------------|--|
| PMIS Project # | 20738 |
| Sponsor Department | Transportation & Environmental Services |
| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |

The project upgrades an existing Dual Corrugated Metal Pipe (CMP) culvert system to convey larger storm events, reducing the chance of surcharging in Mount Vernon Avenue. The project receives funding from the City's Stormwater Utility and a grant from the Virginia Community Flood Preparedness Fund (CFPF).

Project Description

Current Progress

In response to challenges identified during field assessments, the consultant explored alternative options to enhance the conveyance capacity of the existing system. It was determined that lining the existing pipes offered superior conveyance capabilities compared to the originally proposed solution, and at a lower cost. The concept plan was submitted and approved by DCR on April 5, 2024. Anticipate receiving the 60% design on June 10, 2024.

Project Description

Runoff from N Overlook Dr flows to a driveway access between 701 N Overlook Dr and 615 N Overlook Dr. Runoff overtops the north curb of the driveway access and flows towards Pullman PI. This project will increase inlet capture and storm sewer capacity to mitigate flooding for the 10-year storm. In addition, project will ensure no increases in downstream storm sewer for the 10-year storm.

Current Progress

Construction notice to proceed was issued in late February. Maintenance of vehicle and pedestrian traffic, and erosion and sediment control measures were installed and contractor broke ground in early March. Contractor installed underground storm sewer system including 90 linear feet of box culvert. Ting fiber utility relocations were coordinated and complete on 3/19 to accommodate project improvements.

| | |

This project replaces approximately 205 linear feet of an existing concrete retaining wall with a vegetative reinforced revetment and bioengineered soil.

Project Description

Current Progress

Project encountered an extended procurement process due to the non-responsibility determination of the two lowest bidders. VA procurement law requires significant documentation and opportunity for bidders to contest these findings. Staff reviewed the experience submitted by the third lowest bidder and recommended them for award. Active construction anticipated in late spring 2024.

| | Schedule | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------------------|----------|----------|--|----|----|----------|--|----|----|-------------|--|-----|--|--------------|------|----|-----------|-----|----------------|------|---------------|------|----|-----------|------|------|-------|

| Design - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Explanation of Schedule Variance

The construction procurement process was extended as a result of staff's determination that the first and second lowest bidders were non-responsible. Before moving to the third lowest bidder Staff had to ensure all Virginia Procurement processes were followed. This unanticipated extended procurement has delayed the start of active construction.

Project Progress Report

Project Description

This project will design a solution to reduce backyard flooding risk to the maximum extent practicable on the north side of the block of 95 to 127 South Jordan Street. After the field investigation, reviewing CCTV recordings and reading the consultants recommendations, two small scale projects were identified as Phase-1 and Phase-2 projects. Few minor repair works are recommended for Phase -1, which will be completed by Public Works Services team. Phase 2 work with private property owners along S Jordan St and 4600 Duke to improve the existing swale and conveyance on private property. The City will plan to obtain a 15-ft. wide permanent easement the storm drain system in this neighborhood as part of Phase II projects. Obtaining an easement will allow the City to provide maintenance to the storm drain system without having to request permission.

Current Progress

This project design work is scheduled to start in CY26.

Project Description
The project improves the storm sewer system in Valley Drive & Crestwood Drive to mitigate neighborhood
flooding from intense rain events.

Current Progress

Valley Drive storm drain improvement project planning phase is completed. The investigation of neighborhood flooding study is now available which includes site evaluation, CCTV inspection, hydraulic modeling verification, solution development and cost estimations. The project will transition to design at the start of the new fiscal year, when funding is available.

Project Webpage

https://www.alexandriava.gov/stormwater-management/edison-street-and-dale-street-early-phase

Project Progress Report

| Project Name | W. Reed Ave & Dale St Storm | Project Description |
|---------------------|--|---|
| | Sewer Improvements | W. Reed Ave & Dale St. Storm Sewer Improvements Project proposes new inlets and storm sewer along the |
| PMIS Project # | 23048 | 100 block of W. Reed Ave and capacity improvements along the downstream system to the outfall in Four Mile |
| Sponsor Department | Transportation & Environmental Services | Run Park. These storm sewer improvements are a portion of the future Large Capacity Project – Edison and Dale that have been accelerated with Virginia Community Flood Preparedness Fund (CFPF) prior to the funding becoming available in FY 2026. |
| Managing Department | Project Implementation | 5 5 5 |
| Current Phase | Design | |
| Project Status | On Hold | |

Current Progress

The W. Reed Ave & Dale St Storm Sewer Improvements Project requires additional geotechnical investigations to locate gas and sanitary mains along the proposed work area. The City anticipates the geotechnical investigation to be completed in early May. Notices will be distributed to residents prior to the start of work. The project's 90% design will be completed following the geotechnical investigation.

| | Schedule | | | | | | | | | | | | | | | | | | |
|---------------------------------|----------|-----------|--|-----|--|-----------|----|----|---------------|------|----|-----------|----|----|-----------|------|------|------|---|
| Phase | Q1 | 202 Q2 | | 4 Q | | 023 Q3 | Q4 | Q1 | 2024 Q2 Q3 | 3 Q4 | Q1 | 025 Q3 | Q4 | Q1 | 202 Q2 | 24 (| Q1 (| 2 Q3 | 3 |
| Planning - Current Baseline | | | | | | | | | | | | | | | | | | | |
| Planning - Actual | | | | | | | | | | | | | | | | | | | |
| Design - Current Baseline | | | | | | | | | | | | | | | | | | | |
| Design - Actual | | | | | | | | | | | | | | | | | | | |
| Construction - Current Baseline | | | | | | | | | | | | | | | | | | | |
| Construction - Actual | | | | | | | | | | | | | | _ | | | | | |

Explanation of Schedule Variance

Additional geotechnical testing is required to complete the 90% design phase and clarify the location of sanitary sewer within the project limits. The 90% design phase cannot complete until the geotechnical work has been procured and completed. The City's attempt to procure the geotechnical investigation separate from the design contract to reduce costs was unsuccessful. To restore forward progress on the project, the geotechnical investigation will be procured through the existing design contract. The City secured an extension to the Community Flood Preparedness Fund Grant to ensure that the project completes within the grant period.

| Cost Metrics | | | | | | | | | | |
|-----------------------|---------------|---------------------|---------------|---------------------------|---------------|--|--|--|--|--|
| Plann | ing | Desi | gn | Constructio | on | | | | | |
| Planning Phase Budget | Percent Spent | Design Phase Budget | Percent Spent | Construction Phase Budget | Percent Spent | | | | | |
| \$0.00 | 0% | \$275,000.00 | 78% | \$1,955,000.00 | 0% | | | | | |
| Actual Costs | Work Progress | Actual Costs | Work Progress | Actual Costs | Work Progress | | | | | |
| \$0.00 | | \$215,092.16 | 60.57% | \$0.00 | 0.00% | | | | | |

Explanation of Cost Variance

The variance shown between work progress and expenditure to date is a result of an unanticipated geotechnical investigation which delayed the 90% deliverable. The project is anticipated to exceed the design budget due to the geotechnical investigation and construction phase services that were not anticipated in the project's budget. As a result of the City's recent transition to a new project management system, in-progress projects do not have cost data displayed for previously completed phases. Please see the Capital Funds Summary for CIP funding and cost data.

| Managing Department | Project Implementation |
| Current Phase | Design |
| Project Status | Active |
| | |

In order to improve the public transit experience, the City continues to install bus shelters in locations where there is high ridership. This includes replacement of obsolete shelters and installation of new shelters. The shelter locations are prioritized based on ridership and constructability. The project aligns with goals of the Alexandria Mobility Plan and Alexandria Transit Vision Plan.

Project Description

Current Progress

The project team evaluated 82 potential locations for feasibility and selected 20 locations to receive new bus shelters. The shelter site design is underway for these 20 locations. The 60% design is scheduled to be submitted for City and VDOT review later this summer. Project team continued work on transit amenity prioritization at bus stops throughout the City. The installation of these 20 shelters is anticipated to begin in 2026. Future Phases to install additional shelters will follow. The City applied for, and was a awarded, a grant from DRPT for Bus Stop Enhancements. This grant award will be fully authorized by CTB in May/June. Once the award is fully authorized, the project team will notify the ATC Board and Transportation Commission this guarter.

| | |

Project Description The King-Callahan-Russell Access to Transit project is a grant funded project to improve pedestrian and bicycle access to the King Street Metro Station. This is an intersection design project with the goal of enhancing safety for all roadway users. By improving safety and accessibility at this intersection, more people will be able to walk and bike to transit.

Current Progress

Project construction is progressing per the contract schedule. The project is expected to be substantially complete in mid-May, with final completion in June 2024.

Construction milestones include activating the new traffic signal cabinet in mid-April and repaving the intersection in late April/early May. The project team has been actively providing project updates to keep residents aware of project progress.

Project Progress Report

| Project Name | Rt 1 Metroway Enhancements: | Project Description |
|---------------------|--|--|
| | Glebe Rd to Arlington Border | The Route 1 Transitway is the first segment of a 5-mile-long, high-capacity transit corridor connecting the |
| PMIS Project # | 20417 | Pentagon City and Braddock Road Metrorail stations. The initial segment of the corridor was completed in the |
| Sponsor Department | Transportation & Environmental Services | summer of 2014. This project aims to complete the design of the full buildout of the transitway from Glebe Road to the Arlington border and construct those elements that will not be completed as part of private development, as indicated in the North Potomac Yard Small Area Plan (2020). This project aims to ensure that Metroway |
| Managing Department | Project Implementation | better serves new development as well as the Potomac Yard Metrorail Station. |
| Current Phase | Planning | |
| Project Status | Active | |

Current Progress

In Spring 2024, the project team advanced planning phase work on this project. The project will continue to be coordinated with others in the area, such as the East Glebe Road at Route 1. This project is tied to redevelopment in North Potomac Yard.

In Fall 2023, the City applied for funding for full construction of this project. In Spring 2024, the project was recommended for award for \$7 million. Final approval of the award will occur this quarter.

Project Progress Report

| Project Name | Transit Corridor "B" - Duke | Project Description |
|---------------------|--|--|
| | Street Transitway | This project is for the planning, design, and construction of a bus rapid transit corridor along Duke Street from |
| PMIS Project # | 20491 | the King Street Metro to the West End Transit Center at the former Landmark Mall site, where it will connect |
| Sponsor Department | Transportation & Environmental Services | with the West End Transitway. The project aims to improve bus travel times and reliability, customer comfort, and pedestrian and bicycle amenities and safety along Duke Street |
| Managing Department | Project Implementation | |
| Current Phase | Planning | |
| Project Status | Active | |

Current Progress

The project team worked to evaluate the various concepts that were shared with the community for input in Winter 2023. The project is being closely coordinated with the Duke Street at West Taylor Run project as the design elements work together to meet the mutual goals of both projects.

As a result of some of the feedback regarding the service roads, staff has been engaged with Bishop Ireton High School regarding their pick-up/drop-off process. Staff collected additional data along Cambridge Road regarding queueing, space, and volumes to help inform next steps on the service road configurations and is developing graphics that can be shared with the community to provide a better overview of proposed changes to the road.

The project team will finalize the design scope of work and begin the procurement process this summer to advance the design of this project.

| Completed Public Communication | Delivery Date | Planned Public Communication | Scheduled Date | | | | | | | | | |
| Staff communicated with Newport Village's property owners to discuss ROW and easements across their property. Staff coordinated with Dominion Energy to discuss and coordinate relocation of conduits and overlapping projects. The City continued to discuss this project with the community as part of the Alex West planning and engagement process. | Spring 2024 | Staff will continue to discuss utility relocations with Dominion and finalize ROW and easements along Newport Village Property. Staff will begin conversations with property owners about the ROW and easements needed per the 60% design. Staff is attending the Alex West Community meeting on April 23. | Spring 2024 104 | | | | | | | | | |

Note: For the FY 2024 3rd Quarter Capital Projects Status Report, the Capital Funds Financial Summary provides project financial information, as currently organized in the City's financial system of record. As City staff further the integration of the AlexPM system, this financial summary will be updated to reflect the AlexPM organization of projects.
