

<b>Question Report</b>
<b>John Ewald Park Design Community Meeting #1</b>
<b>December 11, 2024</b>
<b>Question Details</b>
Restrooms are not necessarily part of the design?
Would a restroom include a refillable water bottle station? There is generally a ton of empty water bottles all over the park and that feature might cut down on those.
Are electronic copies of the two proposed designs available?
Would the picnic area have grills, or allow bbq grills? Is there a possibility that the pathway could be expanded in option 2?
Has APD determined that both new playground locations are in safe enough of a sightline? Seems like option 1 still might be somewhat far.
Th bathrooms are a necessity. The splash pad would make it a destination as mentioned. Otherwise it will remain a secondary park. We must attract vistors to the park. Can the parkingf lot in option 2 be enlarged ?
option 2 - its safer
I prefer option 2, but I would like to see more pathways like in option 1
Leaning towards #2 but with water play added in some capcity. Thank you.
Option 1
Even without cameras, assuming there will be additional lighting installed around the new play and recreation areas?
