January 02, 2025

Dear Community Members:

The City of Alexandria would like to inform you that field teams will be in your neighborhood surveying City infrastructure in preparation for the design of the Cameron Run Sediment Removal project starting the second week of January. This is a routine stream maintenance project that seeks to remove excess sediment along the reach of Cameron Run from upstream of the I-495 Capital Beltway Bridge to weir #3. This project will reduce flood risk in the project area. Details and work progress updates can be found at the project website: <https://www.alexandriava.gov/capital-projects/project/cameron-run-sediment-removal>. The upcoming work entails only the design of sediment removal activities. The actual removal will take place later after the design is complete.

The City has hired the engineering firm RK&K to perform the design. As part of the design process, their team members will be performing a non-invasive topographic survey of the stream and overbanks. All survey activity will take place in the floodplain. Field staff may need to access your property to reach these areas; however, you are not required to be home during this time. They will not cause any disturbance to your property.

Field operations will take place daily on weekdays from Monday, January 6 to Friday, February 28, between 9 a.m. and 5 p.m. Temporary parking restrictions and traffic pattern adjustments will be implemented during work hours. Access to residential buildings and driveways within the work area will be maintained. Parking restrictions and closure signs will be posted 72 hours before operations begin. Please relocate any street parked vehicles prior to the start of work.

Please share and discuss this notice with your tenants and/or property managers, if applicable.

If you have any questions about this project, please contact me at wael.eltayeb@alexandriava.gov or 703.746.4217. Thanks in advance for your cooperation.

Sincerely,

wael.eltayeb
