

IT PLAN

Significant Project Changes in the Information Technology (IT) Plan Section

This chart highlights any project funding that increased or decreased by more than 15%, or \$1 million, since the last Approved CIP.

NOTE, the “Amount Changed (\$)” and “Percentage Changed (%)” calculations do not include Fiscal Year (FY) 2025 from the Approved FY 2025 – 2034 CIP, or FY 2035 from this Approved FY 2026 – 2035 CIP, since FYs 2026 – 2034 are the years that can be directly compared between the two plans.

CIP Subsection	CIP Doc Title	Total	Amount Changed since	Percentage Changed
		FY 2026 - FY 2035	FY25 Approved CIP	Since FY25 Approved CIP
Other System Development Projects	Enterprise Maintenance Mgmt System	1,500,000	(260,000)	-15%
Network Services	LAN Development	125,000	(25,000)	-17%
Network Services	Enterprise Collaboration	150,000	(30,000)	-17%
Other System Development Projects	Data Quality and Intelligence Platforms	-	(1,400,000)	-100%
Network Services	Information Technology Lump Sum Funding	-	(3,000,000)	-100%

Note: Projects with a \$0 total funding are active capital projects funded in prior CIP's that do not require additional resources.

CHANGES FROM PRIOR YEAR CIP

Prior year City funding totaling \$256,000 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides a content management solution to digitally capture content to make it more readily available for searching and indexing. The retrieval of electronic records supports delivery of government services in a more efficient manner. Document imaging reduces physical storage. Technical investments will adhere to best practices and fit within the City’s overall technology architecture.

Funds are used to support continual improvements and new development to document imaging technologies that support the City's core business applications. This project provides funding for hardware, software, licensing, upgrades, and professional services related to document imaging initiatives.

Changes necessary to support the new Personal Property Tax system were completed in December 2024. The system will be upgraded in early calendar year 2025.

A planned overall review of the current system for continued use and possible replacement that was originally scheduled for FY 2026 will be deferred. Planned funding will be used to perform the upgrade and the system. In the outyears, a cloud-based solution should be reviewed to determine overall feasibility.

CHANGES FROM PRIOR YEAR CIP

Prior year City funding totaling \$350,000 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment.

PROJECT DESCRIPTION & JUSTIFICATION

This system handles most of the City's business tax processing, including assessments, billing, receivables, collections, and enforcements for business personal property, business licensing, reciprocity contractors, meals sales, transient lodging, short term rental, public service corporations and bank franchising taxes. An additional component provides a web based tax portal for businesses, allowing for payment processing, business account maintenance, and submission of annual, quarterly and monthly tax and assessment filings.

This system is currently mature and stable, having been in use for more than 15 years. A major version upgrade is planned for calendar 2025. Funding in out years will be used to evaluate continued use of the current system.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

In 2013-2014 the City implemented an Enterprise Resource Planning (ERP) software suite to improve the automation and support for a range of administrative and management applications. City staff have completed the implementation of the following modules: General Ledger, Accounts Payable, Purchasing, Budgeting, core Human Resources modules, Fixed Assets, and Payroll.

The ERP is stable and running the most current software version. The hardware stack was upgraded in 2023.

The current ERP vendor has announced their support model has changed. In the next few years, all current customers must migrate to their cloud-hosted solution. The vendor plans to discontinue support of on-premises solutions. Funding requests will need to be considered in the out years to explore alternative ERP solutions, and/or to fund the migration to the cloud.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The personal property tax system accounts for the assessment and tax payment processing for all vehicles parked, stored, or garaged in the City; the processing of appeals for personal property assessments; maintenance of vehicle tax records; and the certification of qualified vehicles for personal property tax relief.

Prior year funding was used to retire a 40-year old application in 2025 with a more modern, commercial-off-the-shelf personal property tax system. In December 2024, the new application went into production. This system may require some post-production enhancements as staff continue to identify needs while they use it throughout the year. Prior year funds will be used on post-production enhancements and to sustain and maintain the new system.

Prior year City funding totaling \$199,000 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides funding to implement improvements to the City's online payment and account maintenance portal, including providing compatibility with mobile devices such as smartphones and tablets. In FY 2016, the City implemented the ability for taxpayers to make personal property (car tax) payments online. In FY 2017, the City implemented online real estate tax payments. In FY 2019 and FY 2020, the City enabled taxpayers to create online accounts to view their billing and payment history, schedule payments, and receive electronic notifications. These online payment portal enhancements are currently in a sustainment status with the exception of the personal property tax system which was recently replaced. Prior year funds will be used to perform payment portal enhancements for this newly upgraded system. Finance and ITS will continue to strategize on streamlining business processes and adding new features.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This system handles many of the individual citizen tax processing, including billing, cashiering, receivables, collections, enforcement, and a web-based payment portal. The system was originally installed and configured for real estate property taxes but was recently enhanced to include vehicle personal property tax processing. Outyear funding will be used to sustain and perform upgrades to the core application. Finance and ITS will continue to strategize on streamlining business processes and adding new features.

CHANGES FROM PRIOR YEAR CIP

Prior year City funding totaling \$129,497 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment.

PROJECT DESCRIPTION & JUSTIFICATION

This project funds improvements to the City's computer assisted mass appraisal (CAMA) system, which Finance staff uses to complete annual assessments of all real property in the City. The real estate accounts receivable system relies on property valuations data from the CAMA system. Data from both systems are then used to generate the real estate tax bills. The last upgrade and architecture refresh significantly extended the useful life of the CAMA system. Additionally, the vendor is regularly supplying enhanced features and ensuring that the architecture is maintained at the latest version. Current funding will be used to maintain the system and architecture. Out year funding is planned for the potential replacement of the application.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The City's Geographic Information System (GIS) is the primary source of information on hundreds of layers of spatial data (streets, parks, parcels, population, etc.). GIS provides this information through applications that address an extensive array of business needs. GIS data and technology are central to many of the City's most critical business applications including Computer Aided Dispatch, Asset Management, Real Estate Assessments, APEX (permitting) and Stormwater Utility. This project funds resources to collect, distribute, access, and analyze this data. GIS data allows the City to better inform staff, decision makers and the public on many aspects of City operations. GIS capital funds are primarily used for professional services, GIS hardware and software and the biennial collection of base mapping data.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides for new and replacement database infrastructure hardware, software, licensing, upgrades, and tools. This project provides funding to periodically (every 3-5 years) refresh the database technologies and stay current with the manufacturer's lifecycle. Keeping the City's database infrastructure compliant with vendor releases ensures the long-term viability of critical City applications that are used to assess taxes, issue bills, make payments, manage permitting and land management processes and others. This project will occasionally fund the acquisition of new database hardware, infrastructure, and professional services when new needs arise from City staff. Prior year funding will be used to complete current database application upgrades and to supplement current database administrative staff.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project funds the roll-out of new features for the City's enterprise content collaboration platform, as well as to adhere to the system manufacturer's lifecycle. This is a web-based collaboration platform integrates with the City's email, desktop productivity tools, messaging, and cloud-based storage functions. The approved funding supports the roll-out and training associated with mobility and "work-from-anywhere" initiatives, including native apps on mobile devices; the training and promotional costs of driving end-user adoption of cloud computing; and the implementation of content management features, such as retention policies, classification for search, and cloud security tools. Funds budgeted in this project are used for research and development activities to define a roadmap to deploy new cloud products and features.

Migration of the City's intranet to to a new platform remains the primary focus this year. Staff will assist departments in managing their individual page transitions and upgrading these to modern architecture.

CHANGES FROM PRIOR YEAR CIP

Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

As the City continues to digitize processes and furthers the initiative to “go green”, the data storage requirements continue to increase which requires additional storage capacity. This project provides funding to maintain and upgrade data storage required for the virtual infrastructure. The data storage platform provides improved disk utilization, data redundancy, and management. This project provides funding to perform upgrades to include data storage expansion while maintaining optimal performance and resiliency.

CHANGES FROM PRIOR YEAR CIP

Prior year City funding totaling \$106,003 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment.

PROJECT DESCRIPTION & JUSTIFICATION

Funding for this project is used to support the technical service desk operations which includes incident, request, and change management directly related to technical support services for City staff. In FY 2019, ITS implemented a system that includes electronic workflows and automated email notifications. Overall IT efficiency is gained by leveraging this system to automate repetitive tasks and it serves as a central repository for IT service catalog items. Starting in FY2026, planned funding will be used to begin the evaluation of a major upgrade and/or to implement new features and capabilities.

CHANGES FROM PRIOR YEAR CIP

Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

The City needs computer hardware that meets modern technology standards and application requirements. Funds in this project are used to procure new City platform technologies to include end-use computing devices and related components or companion products. The IT Equipment Replacement project ensures that City staff have appropriate platform technologies and resources necessary to perform core job functions, and that the City's physical IT equipment is replaced on an appropriate schedule to avoid downtime and/or service disruption.

The project's goal is to provide appropriate hardware and companion products to support the City's workforce in their day-to-day job functions. Funding levels will ensure City staff are provided with appropriate computing equipment to enable remote work. Technology requirements have significantly shifted towards a digital workforce calling for mobile endpoint devices. Funds are used to procure City endpoint technologies (laptops, desktops, peripherals, related components, and companion/mobility products). Funding is used to replace legacy equipment on an ongoing basis to ensure compatibility with the software and improve the overall digital work experience.

PROJECT DESCRIPTION & JUSTIFICATION

The IT Enterprise Management System project supports the proper lifecycle management of operating system and application software installed on information technology equipment. This project provides funding to automate software deployment and patch management. ITS leverages this tool to streamline and standardize the deployment of both servers and staff computing devices. This allows the City to stay current with software manufacturers’ lifecycle and/or address vulnerabilities. The equipment replacement program is dependent on the use of this efficient tool.

CHANGES FROM PRIOR YEAR CIP

Funding planned for FY 2026 reduced by \$25,000 as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding, along with prior year balances, remains in this project to support immediate term needs.

PROJECT DESCRIPTION & JUSTIFICATION

This project maintains or upgrades the local area network (LAN) infrastructure in City government buildings, including data cabling, demarcation, racks, cabinets, and closets. This project ensures that current data runs, and new data connections associated with office moves and renovations will consistently provide staff sufficient data speeds, based on the latest network technologies deployed in the City. The condition of all the local area network rooms is essential to the optimal performance of network equipment connecting to the City's I-Net. On an on-going basis, ITS ensures the quality of the local area network is consistent with I-Net by continuously performing required cable drop maintenance, installation of new or replacement network drops, and other related equipment replacements or upgrades.

CHANGES FROM PRIOR YEAR CIP

Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

This project enables the City to deliver scalable access to data, voice, and video communications on the City's Institutional Network (I-Net). This project funds the replacement and acquisition of networking equipment which includes core switches, edge switches, firewalls, routers, gigabit modules, fiber optic cable, networking monitoring tools, packet filtering/traffic shaping devices, and professional services. Consulting services are used when making network modifications, which are required for integration of various products or services. Funding will be used to replace legacy networking equipment that is used for access and will ensure the successful delivery of the necessary connectivity for government operations.

CHANGES FROM PRIOR YEAR CIP

Funding planned for FY 2026 reduced by \$361,000 as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding, along with prior year balances, remains in this project to support immediate term needs. Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

The City currently leases a fiber-optic network from Comcast that provides an institutional network (I-Net) connection to all City government facilities including Libraries, City government offices, and ACPS educational facilities. This project funds the design and build-out of a City-owned municipal fiber network which will replace the Comcast network with approximately 40 miles of fiber-optic cable and will provide greater and more uniformly available wide area network (WAN) services to meet current and future projected City service levels. Mandatory, critical City communications are supported over the I-Net: the City's VoIP telephone system, public safety dispatch systems, data network services, Internet, and mission-critical system applications.

Previously approved funding supports the construction of the fiber network. The funding in the out years will support the successful delivery and sustainment of the municipal fiber network as well as its related components.

CHANGES FROM PRIOR YEAR CIP

Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

The purpose of this project is to fund the technical implementation of security technologies to protect data confidentiality, integrity, and availability of the City's Infrastructure. The City's information security program's function is to proactively identify, assess and implement solutions to address the City's IT vulnerabilities. Evaluating the role of new security technologies and methodologies is a continual process that requires investment. Funds programmed in the out years of this plan will be used to procure necessary tools, software, and services to better combat threats and improve the City's security posture. Funding in this project provides for continued IT and cyber security system protections, enhancements, replacements and upgrades, service consultation expenses, and future security product and service acquisitions to assist with ensuring authorized access of City systems and information.

Investing pre-emptively in security measures reduces the risk of an incident occurring. IT security continues to be a fundamental component of the City's enterprise architecture and strategy.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

This CIP project was included in the City's Information Technology Services Departmental strategic plan.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides for the phased replacement of the hardware and software required to operate the City's network server environment in a secure, high performing, and reliable manner. Prior year funds were used to replace a legacy data recovery solution. The funds will be used to procure necessary hardware, software upgrades, client access licenses, virtualization licenses, and network operating system licenses. Planned purchases include chassis, chassis components, server blades, and memory.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project enables staff remote access to various City services and applications. Funding is provided to allow secure remote access for employees who telework and employees who work at remote locations. Prior year funding was utilized to further enhance City employee telework and remote access capabilities. In addition, funds were used to enhance security and stability for public wireless access in City facilities. Funds programmed in the out years will be used to procure new technology, update licensing, and procure related hardware devices to sustain the remote access and wireless infrastructure. In recent fiscal years, various improvements have been made, including software upgrades and equipment replacement to enhance the remote worker experience and improve the cybersecurity posture.

Outyear funding will be used to replace the current solution hardware, deliver increased functionality, and allow the use of various security enhancements for the remote work environment.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The funding for this project has been programmed to ensure the enterprise time and attendance application remains viable and is compatible with the City's overall technology environment. The current application has been in use for more than 10 years. Staff will maintain the current application and evaluate the vendor's product roadmap and feasibility of cloud adoption.

The system hardware and software are running on supported versions. The City has begun the process of discovery needed to implement a migration to the vendors' cloud managed services. This effort will include an upgrade of the Time & Attendance module and a separate upgrade for the public safety Scheduling and Compliance module. The cloud migration project will begin in summer 2025. The current vendor will no longer support on-premises installations.

CHANGES FROM PRIOR YEAR CIP

Funding planned for FY 2026 reduced by \$316,741 as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding, along with prior year balances, remains in this project to support immediate term needs. Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides funds to upgrade the Windows operating system, maintain a current Microsoft operating system service plan, and provide an up-to-date Microsoft productivity suite on City workstations, as well as to fund required improvements to end-user computing devices, peripherals, or other related hardware components as necessary. This project also provides funds for the labor costs of installing the new operating systems and related software components. Additionally, funding is used to test the viability of newer operating systems, mobile devices and laptop technologies with current City applications and hardware. Testing workstations prior to enterprise implementation is necessary to help ensure efficient roll-out of new technology and minimizes disruptions related to application or hardware compatibility issues.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides funds for the replacement of the legacy Voice over Internet Protocol (VoIP) architecture, the City's enterprise telephony systems, and services. Project funding is used for the City's telecommunications infrastructure which includes software, servers, switches, and handsets. Routine hardware replacement and software upgrades need to be performed to maintain a viable and reliable VoIP infrastructure.

Funding will be used to replace end-of-life hardware, software, and evaluate other more modern and unified voice communication platforms that meet the City's current and future business requirements. Staff is in the process of evaluating modern, unified voice communication platforms to replace existing telephony infrastructure.

PROJECT DESCRIPTION & JUSTIFICATION

The Alexandria Department of Community and Human Services is a unified agency focused on achieving the safety, well-being, and self-sufficiency of the residents of Alexandria. The array of services that the department delivers span the life cycle from early childhood to older adulthood. The types of services include mental health, public benefits, substance use disorder, residential, developmental disabilities, homelessness prevention, child and adult protection, early intervention, youth, and workforce development services. On average, the department will serve more than 24,000 residents each year.

The department is unique in that it has responsibility for both Behavioral Health and Social Services, along with other areas. Having most services under one roof provides important opportunities to respond more comprehensively to the complex needs of individuals and families. The department has several strong models of collaboration, care coordination and information sharing among the services delivered. These models have largely been driven by the complex needs of individuals and families facing mental health, housing, financial, and family safety crises. These models are extremely valuable and demonstrate the effectiveness of integrated information and service delivery.

In the national models of integrated service delivery, a key element of this approach is the systemic access and integration of information. This will make it possible to improve the client experience, improve accuracy, expedite eligibility determination, and ultimately improve outcomes. On a macro systems level, the integration of information will make it possible to identify trends, make projections, and target resources. As integrated data increasingly provide the raw materials for evaluation, research, and risk modeling, it is critical that we examine the ways in which data reflect systemic racial inequities in the development and administration of policies and programs. Any approach that is adopted must reflect a built-in racial equity analysis process.

Staff selected a suitable solution that meets the City's requirements. The plan is to sunset the current case management application and implement the new solution in a phased approach by each program. The new system encompasses moving the data to the new application, case and financial management, as well as compliance reporting.

CHANGES FROM PRIOR YEAR CIP

Funding planned for FY 2026 reduced by \$260,000 as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding, along with prior year balances, remains in this project to support immediate term needs.

PROJECT DESCRIPTION & JUSTIFICATION

This project provides for the continual improvement of the City's enterprise maintenance management system (EMMS). This system is a service request/work order management system used by departments in the day-to-day activities associated with maintaining assets and infrastructure. Improvements to this system will provide full lifecycle management of City-owned assets. The EMMS integrates with the City's Geographical Information System, serving as an asset inventory with location details and it is the foundational system behind the City's current service request system, Alex311.T&ES, Recreation, and General Services utilize this system.

Funding was requested because all three departments wish to modernize and standardize processes within their respective programs. Areas of enhancement include inspections processing, standardize scoring of asset conditions, and collecting additional inspection data to support analysis and cost forecasting for sanitary sewers, bridges, and stormwater abatement assets. Improvements to the closed-circuit television pipe inspections program are planned and more emphasis will be on application usability from mobile devices for staff who perform work in the field.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project funds improvements to the City's suite of fleet management software. Core fleet management software provides for vehicle inventory, vehicle service record history, shop records, parts/material inventory and labor costs of repair. An ancillary fuel management system for dispensing fuel, controlling access to fuel, and tracking fuel usage by vehicle. A third software system monitors physical fuel storage, tank level, and leak detection.

For the core fleet software, a full version upgrade was performed in January 2023. This brought the core software up to the latest hardware and software versions. A Motor Pool management feature was implemented that allows for online reservations submission and integration of key-box technologies.

In FY 2025, emphasis will be on the two ancillary systems for fuel management and storage tank monitoring, as both systems are nearing end-of-life. Replacement of these software systems is dependent on physical construction planned for the fuel islands and on new fuel dispensing hardware being deployed. An expansion of the Motor Pool module is planned, adding an additional location for fleet vehicles at the Del Pepper Community Center on Mark Center Drive.

PROJECT DESCRIPTION & JUSTIFICATION

The City Attorney's Office receives, and processes Freedom of Information Act (FOIA) records requests made to the City by Virginia residents or the media. Under the Virginia Freedom of Information Act, the City has five working days to provide responses to requestors. In order to provide an efficient, web-based request platform for individuals seeking public records and to appropriately coordinate records requests, the office uses a system that tracks requests and communicates with staff when requests have been assigned. In FY 2025, existing funding was used for customer service enhancements to align with the vendor's current product lifecycle.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project supports the replacement of the City's impound and towing management software system. The current system has been in use for more than 15 years, and it was custom developed in-house using a legacy programming language which is now end-of-life. The new system will have more automation and it will manage the entire impound process. It will track a vehicle from impound through release or disposal, accounting for vehicle information, pickup and storage locations, towing information, and all fees, payments associated with the impound including credit card processing.

A cloud hosted solution is being implemented with go-live of the first phase scheduled for spring 2025. The scope of this effort includes both law enforcement and PPI/Repo tows and modernizing business process for T&ES, DECC, and APD.

Future enhancements could include integrations with the APD Records Management System, the state Virginia Criminal Informatoin Network database, and third-party auction systems.

PROJECT DESCRIPTION & JUSTIFICATION

The Alexandria Library must periodically update and install new equipment in library facilities to replace outdated computers, end-of-life servers, software and to address technology needs. This project aligns with the Library's goals, which seek to increase technology use in Library facilities, focus staff attention on educational programming for the community, improve access to Library collections, and highlight efforts to improve customer service. These resources are vital for the Library's ability to continue meeting customer expectations.

The Library has reviewed and assessed the costs of replacing and adding equipment to all its facilities. The Library has identified several replacement areas including staff equipment, self-service stations, and boardroom audio visual equipment. Funds will be used to procure technologies (laptops, desktops, servers, peripherals, related components, and companion/mobility products), including new hardware and software to upgrade and maintain its network.

Library staff will be responsible for implementing and maintaining equipment during daily operations. All Library hardware will be inventoried as standard practice. All web-based equipment will include necessary software for internet security and antivirus control along with security procedures to identify usage and track location. Onsite equipment will be equipped with standard hardware and software resources to protect investment and will comply with all Commonwealth of Virginia required data backup and storage laws.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

Alexandria's libraries maintain an automated system for managing the computers made available to the public. The system manages the waiting lists for computers, monitoring time limits for computer sessions, and manages customer printing. A system with enhanced features that accepts credit card payments for print jobs was implemented in April 2017. The upgraded kiosk system has improved service options for Library users, including the ability to print from USB drives. In 2018, a wireless printing component was implemented, allowing users to print from their mobile devices. This updated system also accepts credit card payments using modern chip and pin compatible terminals, resulting in PCI Compliance. The system has also improved the Libraries' accounting and reporting functions. Library users have responded positively to an updated process that offers additional features and the convenience of credit card payments. The public service kiosks and credit card terminals were replaced in FY 2025.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The Alexandria Public Library's Local History/Special Collections branch has implemented a Digital Asset Management System (DAMS). A DAMS is an essential business need for special collection repositories due to the users being geographically dispersed. The cataloging module of the DAMS software will allow discoverability of the collection in the Library catalog. It is equally important to improve access to materials through a DAMS for those City agencies involved with planning, tourism, archaeology, and infrastructure. A DAMS allows for digital access to materials, as well as information to be re-used by other national, State, and City-level sites and projects.

The Library's Local History/Special Collections has a specialized collection which includes microfilm and microfiche. Prior year funding was used to procure micrographic equipment and associated equipment, as well as the Digital Asset Management System (DAMS). The current system is in a sustain and maintain status and outyear funding will be used to perform memory upgrades which will be replaced on a 3-year cycle. Outyear funding will be used to do a system replacement which is planned to occur on a 5-year replacement cycle.

CHANGES FROM PRIOR YEAR CIP

Prior year City funding totaling \$33,000, along with \$3,000 planned for FY 2026 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment/project needs.

PROJECT DESCRIPTION & JUSTIFICATION

The Alexandria Library has a “software-as-a-service” (SAAS) based integrated library management system (ILS).

Alexandria Library’s current ILS has been consistently updated with the current vendor’s offerings, implemented in 2009. After 16 years with the same vendor, City stakeholders reviewed technological changes in the industry. Newer technologies are available in ILS systems, including integrated community engagement and marketing tools, improved discovery interface, increased customer privacy, better application interfaces, integrated website management and event organization.

Funding will be utilized to procure and implement a new Integrated Library System. The City has identified a suitable replacement for the Alexandria Library ILS. Migration to the new system is anticipated to be completed by FY 2026. .

PROJECT DESCRIPTION & JUSTIFICATION

The Office of Voter Registration and Elections maintains Electronic Poll Book (EPBs) and voting equipment system. Both systems have an estimated useful life of 7-12 years. Funding in FY 2026 will be used to procure equipment that complies with state mandates and make sure the systems are available for future elections.

The Electronic Poll Book System (EPB) can be tablets, laptops and related hardware and software. The Virginia State Board of Elections (SBE) assists the City in keeping current with its required electronic poll books by certifying vendors that the City can purchase from directly. The City keeps the EPBs current by maintaining a version that is certified by the Virginia SBE. The voting equipment system is a combination of ballot scanners, Americans with Disabilities Act (ADA) accessible ballot marking devices, high speed central scanners and ballot on demand machines. The new systems must be certified by both the federal Election Assistance Commission (EAC) and the SBE.

PROJECT DESCRIPTION & JUSTIFICATION

The purpose of the Point of Sale (POS) system is to provide in-person and online retail sales for the Office of Historic Alexandria's (OHA) museums and retail stores. The application has been in production for over a decade. The point-of-sale system is currently used at eight brick and mortar locations and it has an integrated online shop. Other departments, mostly DCHS, use the POS system to collect online donations, under the administration of OHA. The current POS system is now near end-of-life. The implementation of the replacement project will begin in FY 2026.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project funds the Office of Historic Alexandria's Records Management System. This software is used for tracking the large collections of City records and making them available to both City employees and the public, in accordance with all applicable state and local regulations governing the management of City records. The records management software is essential to providing business process efficiency while ensuring regulatory compliance. In FY2026, staff will work to define a plan to perform a major application upgrade.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

Office of Historic Alexandria Departmental Five-Year Strategic Plan.

ADDITIONAL OPERATING IMPACTS

No additional operating impacts identified at this time.

PROJECT DESCRIPTION & JUSTIFICATION

This project funds the system used for the administration of the City's land use management and development process. The system is used by multiple agencies including Code Administration, Transportation & Environmental Services, Planning & Zoning, Fire, Office of Historic Alexandria, Finance, Special Events-Park/Recreation, and the Health Department. TPermit processes include the administration of commercial and residential permits for building and trade work, fire prevention, outdoor dining, elevators, noise permits, the residential rental inspections program, and Special Event registration and tracking. The permitting system also supports administrative and City ordinance processes such as site plans, developmental special use permits, special use permits (SUP), board of architectural review cases (BAR), Board of Zoning Appeal cases, certificates of occupancy, code modifications, vacant building registrations, unfit properties, hauling, reserved parking, and complaint processes regarding maintenance of existing structures, civil penalties, fire inspections, tenant/landlord complaints, SUP and BAR violations.

A major upgrade was completed in FY 2025 and staff plan in the coming years to evaluate the vendor's product roadmap to adopt the recently released cloud hosted solution.

CHANGES FROM PRIOR YEAR CIP

Prior year City funding totaling \$250,000 removed from this project as part of CIP reductions/reprioritizations to support other critical capital needs. Sufficient funding remains in the project to support current environment.

PROJECT DESCRIPTION & JUSTIFICATION

This system manages the day-to-day operations of the recreation centers and other ancillary programs administered by the Department of Recreation, Parks, and Cultural Activities. The Recreation Database System is a central customer database, providing financial and statistical reporting, activity registration, facility reservations, and pass management. The system was recently migrated to the cloud and is mature and stable. Replacement of the credit card reader hardware and software is nearing completion.

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

Funding in the out years for this project will be for programming services, the acquisition of commercial-off-the-shelf packages, or cloud hosted solutions for small applications that provide critical support for department priorities. ITS staff supports and administers several dozens of these ‘small’ applications that must be properly sustained and upgraded to keep pace with current technologies.

During FY 2025, staff started to work on a plan for the migration of the City’s Archaeology system to a cloud-hosted vendor platform.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

N/A

ADDITIONAL OPERATING IMPACTS

This project is currently supporting the implementation of an Archaeology Database system for the Office of Historic Alexandria. Once implemented, an annual license/subscription fee is anticipated.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The City's Customer Relationship Management System (Alex311) provides a central coordination of requests for service from the public and other external stakeholders. This citywide system meets customers' expectations by connecting them to information, services and solutions. Alex311 is managed centrally by the Department of Emergency and Customer Communications (DECC). Technology enhancements to Alex311 are vetted by the Alex311 Steering Committee (including staff from Information Technology Services, Transportation and Environmental Services, Office of Communications & Community Engagement, Recreation, Parks, & Cultural Activities, and the Office of Performance Analytics). The Alex311 team is the front line of assistance for all customer service requests, inquiries, complaints and commendations.

The City's CRM solution includes capabilities, such as a knowledge base of commonly asked questions, custom response templates, collaboration tools, GIS data, and integrations with other City enterprise systems are available to assist staff in providing efficient and accurate customer service. Expansive reporting capabilities are also built into this software which allows the Alex311 team to gauge how well we meet customer service goals. Prior year funding will be used to evaluate emerging technology for potential automation integration opportunities. The outyear funding supports evaluation and discovery of a replacement system and/or enhancements to the current environment.

PROJECT DESCRIPTION & JUSTIFICATION

The E-Government project includes enhancements to, and applications for, the City of Alexandria's public website, www.alexandriava.gov, related sites, the City's Intranet (AlexNet), and various technology innovation initiatives to benefit both the general public and City employees.

The most significant E-Government project of FY 2026 will be addressing a federal mandate for the City to legally comply with the Web Connect Accessibility Guidelines provision of the Americans with Disabilities Act (WCAG ADA WEB Section508). This will include an assessment of public-facing web resources and remediation activities to comply with the act.

Additionally, in FY 2026 staff will continue its modernization initiative of E-Government applications; evaluating security, user access and core capabilities of the suite of customer-facing applications and undertake appropriate modernization actions to ensure they are effectively meeting the needs of our customers.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

N/A

ADDITIONAL OPERATING IMPACTS

The estimated maintenance and support cost for external facing site and intranet service providers is \$64,000 annually.

CHANGES FROM PRIOR YEAR CIP

Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

The Alexandria Justice Information System (AJIS) provides multiple City agencies and the law enforcement community with access to civil, criminal court and inmate management data, mug shots, documents, and reports. Users depend on AJIS to provide mission-critical judicial and jail management information. AJIS interfaces with other systems to furnish data to other local, regional, and national law enforcement agencies. The AJIS system is critically important to the entire judicial process for the City.

The AJIS system must be replaced. Continuing maintenance is becoming a challenge, making this a high priority project. In FY 2020, staff defined system needs, analyzed available products, and determined the additional budgetary requirements to replace AJIS. The state's court case management system was implemented in FY 2025 along with the Data Exchange Hub. Staff are currently working with vendors to implement a Jail Management Solution (JMS), Prosecutor's Case Management System (PCMS), and a Warrant's Module. The project funding includes staff augmentation as well as vendor assistance throughout the multi-year implementation.

CHANGES FROM PRIOR YEAR CIP

Funding added for FY 2035.

PROJECT DESCRIPTION & JUSTIFICATION

In FY 2013, the City of Alexandria initiated a project for the design, implementation, and support of a Computerized Aided Dispatch (CAD) System. The system supported the emergency needs of Law Enforcement and Fire/EMS with an integrated Mobile Data client (Mobile), Law Enforcement Records Management System (RMS) and Electronic Patient care reporting (ePCR) System. In January 2015, the City successfully deployed several critical components of the system that best met its functional, technical and integration requirements in a cost-effective manner. In April 2017, the Police RMS and Field Based Reporting systems went live.

The current Computerized Aided Dispatch system has been in production for over a decade. Staff will maintain and sustain the current CAD environment. The available project balances will be used to perform recommended best practices that will keep the system viable.

PROJECT DESCRIPTION & JUSTIFICATION

For the past decade, the use of electronic presentation technology in courtrooms has become a widely accepted and successful practice throughout the judicial system, and is currently in use in Fairfax, Arlington, and Prince William Counties. The Alexandria Circuit Court has three courtrooms that are used for various court proceedings, including jury trials, bench trials, motions, and hearings.

This project provides funding for Courtroom Trial Presentation Technology that will provide citizens, the Commonwealth Attorneys, Public Defenders, private attorneys, and litigants a more modern and convenient way to present evidence during court proceedings. In addition, the courtrooms are utilized by City departments and agencies such as the Court Service Unit for their court-ordered parenting classes (FOCUS), the Alexandria Bar Association for their continuing legal education seminars, and the Sheriff's Office for their swearing-in ceremonies and occasional training sessions. The upgrades also enable video conferencing technology, which allows witnesses and inmates to testify at trial without being physically present in the courtroom.

This is a multi-year project that will be completed in phases, where several courtrooms will be upgraded with new technology, including electronic presentation systems and audio visual (A/V) equipment. Circuit Court Courtroom 2 and Courtroom 4 are completed. Circuit Court Courtroom 1 upgrades will start in FY 2025.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

N/A

ADDITIONAL OPERATING IMPACTS

It is expected that the complete Courtroom Trial Presentation System and audio components will have an annual maintenance cost, billed by the A/V vendor.

PROJECT DESCRIPTION & JUSTIFICATION

The current Police traffic citation process is largely manual, and paper based. The manual process can result in data entry errors, backlog of data input, and insufficient, untimely analytical abilities. The Alexandria Police Department conducted a pilot program of 25 police officers for electronic citations using limited approved funding from the CAD project. The pilot program involves participation from Police, Courts, and the ITS departments. The electronic citation program will fully automate the ticketing process: from the creation of the ticket to processing within the courts.

If additional funds become available, the electronic citations implementation will allow for an additional 225 users. Officers will use their already assigned mobile phones to issue tickets for moving violations. The project benefits include reducing the time needed to process citations, statistical information, auto-complete information, and an automated data interface to the Police records management system. This solution will streamline the citations by moving from paper to electronic based processes.

The solution also provides a more robust solution to complying with the State's recent "Community Policing Data Collection ACT" which requires officers to document all interactions with the public (subject stops etc.) regardless of a ticket or any other official paperwork needing to be completed. The current method of capturing this Act's required fields is cumbersome for the officers and the goal is to use this software to meet the need more efficiently. The eCitations software and subsequent maintenance and upgrades will ensure APD stays in full compliance with this Act allowing us to analyze and report on all public encounters.

As of FY2025, Police have successfully completed the project and fully deployed the devices and licenses. The project is currently in a sustain and maintain status.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The Emergency-911 Phone System is the emergency phone system for the public to request emergency services from the City. The emergency 911 phone system link is vital and must be redundant and available 24/7/365. In September 2019, the City of Alexandria and Arlington County transitioned from an analog phone system to a joint NextGen 911 fully compliant phone system focusing on inoperability and improving efficiency in the handling of 911 calls in order to improve operational standards. This single integrated system provides both jurisdictions the ability to receive and process their respective 911 (emergency) and 10-digit (non-emergency) telephone calls from either jurisdiction's primary or backup 911 center. In addition, both jurisdictions have the ability to receive and answer each other's 911 and 10-digit telephone calls when either is unable to do so, such as during a system/facility failure or 911 center facility emergency.

Outyear funds will address potential replacement, upgrades and/or enhancements to the current system.

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The Fire Records Management System (RMS) is an enterprise-level application that supports all facets of the fire department operations and encompasses modules for human resource management, training, staffing, emergency incident reporting, billing, emergency preplanning, quality assurance, performance analysis, community outreach, and logistics. The systems are highly integrated and provide efficiencies of scale.

The Alexandria Fire Department selected a vendor and implemented a comprehensive critical RMS product suite. The RMS includes Personnel Management, NFIRS Fire Reporting, Properties/Occupancies, Electronic Health Records/Patient Care Reporting & Quality Management. It also includes the development of several Integrations between the new RMS and existing systems.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

N/A

ADDITIONAL OPERATING IMPACTS

Annual maintenance agreements will be necessary; current software agreements are approximately 20-25% of original outset per year

FIRE EMERGENCY OPERATIONS CENTER TECHNOLOGY

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

The Emergency Operations Center (EOC) is a citywide 24/7 asset available for use during large scale incidents, natural disasters, and severe weather emergencies. The EOC is designed to serve as a central response and/or recovery coordination hub staffed with personnel from across City departments and organizations. The EOC facilitates coordination efforts, serves as the central workplace during emergency operations, and is typically open during periods where a Declaration of Local Emergency is in force.

Prior year funding will be used to continue the replacement of laptops, workstations, monitors, and audio-visual equipment at the primary EOC location. This funding allows the City to maintain a level of readiness by establishing a replacement cycle for equipment at both EOC locations.

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project funds the parking citation system, which includes parking citation issuance devices, citation processing, collections, online management of parking citation accounts receivables, and reconciliation reporting. This system will be particularly focused in areas with metered parking and residential parking restrictions such as Old Town and Carlyle.

The current system was placed in production in FY 2022, and it is actively being used as the parking citation management solution. The current parking citation system is hosted in the cloud by a 3rd party vendor, and it provides the services of citation issuance, citation processing, account receivables, and collections with reporting flexibility. The system is currently in a sustain and maintain status and it will be actively reviewed for any required enhancements.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

N/A

ADDITIONAL OPERATING IMPACTS

Annual licenses/subscription costs are anticipated for the cloud-hosted 3rd party vendor.

PUBLIC SAFETY ALEXANDRIA INFORMATION EQUIPMENT

CHANGES FROM PRIOR YEAR CIP

No changes from prior CIP.

PROJECT DESCRIPTION & JUSTIFICATION

This project consists of several specific goals spread over multiple fiscal years that are needed to maintain the radio system's current level of reliability, to add features, and to ensure sufficient capacity for radio system users, and implement radio management best practices.

Prior year funding was used to upgrade the core radio components and the 9-1-1 system recorder, replace the backup power supply at the Masonic Temple, and to replace the air conditioning units. In FY 2021, funds were utilized to implement remote radio dispatch consoles, and some planned initiatives were deferred due to COVID. Activities in FY 2022 included accelerated upgrades at one radio site due to the building being converted to residences. Air conditioning, antennas, and feedlines were all replaced at this site. Projects completed in FY 2023 included a core system upgrade. FY 2024 included the procurement of Fire portable radio replacements, and antenna replacements at the Masonic Temple radio site. FY 2025 projects underway include the beginning of the three-year program to replace law enforcement (Police and Sheriff) radios and the beginning of the five-year program to replace all public safety mobile radios. Also, in FY 2025 the remaining two of four antennas will be replaced.

EXTERNAL OR INTERNAL ADOPTED PLAN OR RECOMMENDATION

DHS Office of Emergency Communications, Guidelines for Encryption in Land Mobile Radio Systems, September 2013; National Capital Region Strategic Interoperable Encryption Plan, Approved by Police Chief's Committee April 28th, 2013

ADDITIONAL OPERATING IMPACTS

Additional operating costs will be incurred as City onboards replacement portable radios for public safety agencies.
