Are You Cybersecure? A Special City of Alexandria Cybersecurity Learning Opportunity

The City of Alexandria has proclaimed its strong commitment to keeping residents and business cybersecure this Cybersecurity Awareness Month, so it must be asked: Are you cybersecure?

With all the data breaches and account takeovers happening across the country, you are probably justifiably concerned about your own digital protection. The City of Alexandria's Commission on Information Technology, Information Technology Services Department, and Computer CORE are here to help.

We are hosting a special cybersecurity learning opportunity for residents of the City of Alexandria this Saturday (October 25) where you will learn:

- How to keep the bad guy out of your accounts
- Tips for protecting your on-line privacy and preventing identity theft
- Strategies for defending yourself from scams and malware

Doing all that may sound complicated, but it's really easy – if you know how – and you will learn how on Saturday.

As a special bonus, attendees will be given an opportunity to participate in a raffle for computers donated by Computer CORE.

The "Are You Cybersecure?" event will take place from 10am until noon in the auditorium of The View Alexandria (formerly the Hermitage), 5000 Fairbanks Ave., Alexandria this Saturday (Oct. 25).

The program is free, open to the public, and light refreshments will be provided.
