## TOPIC

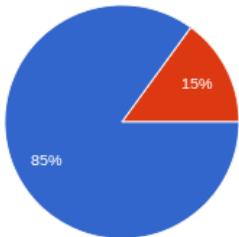

.Changing King Street Bathrooms

## TOPIC DESCRIPTION

Currently the King Street bathrooms specifically the boys bathrooms have a bad odor coming out of them. This issue is because of the urinals not having any water to flush down the students pee which leads to a unbearable smell. Due to this there are times where students avoid using bathrooms because of this issue, another issue is the safety of those bathrooms since theres a gap between the bottom and top it makes students feel unsafe at times. This issue matters at ACHS because not only do students deserve to have clean bathrooms but so do the teachers and staff.

## BASELINE DATA & GOAL

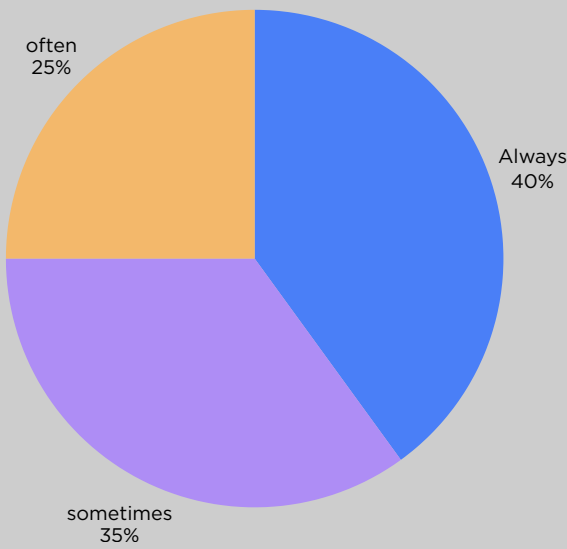

With this data it shows that 60% of ACHS students want to change the current King Street bathrooms while 25% say maybe and the rest 15% think it should stay the same.

## CYCP GOAL & STRATEGIC AREA

This issue connects to the School Facilities and operations. With this we can better the schools bathrooms

## WHAT IS HAPPENING RIGHT NOW?

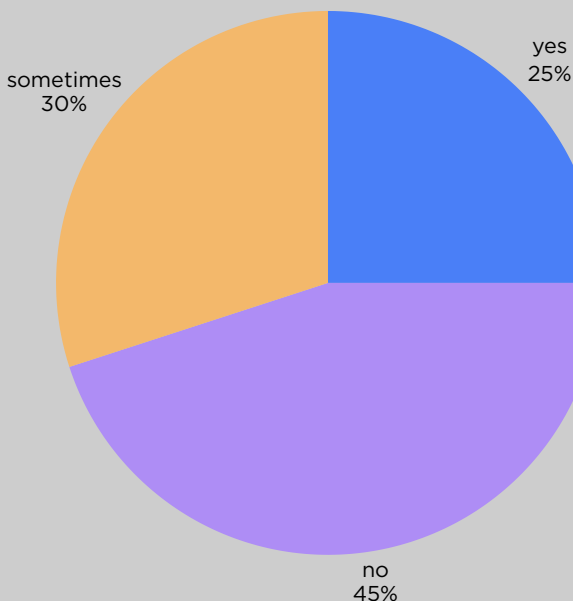

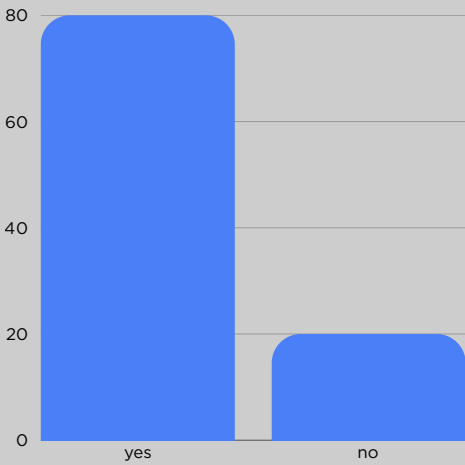

This Data shows that 40% of students always and 35% sometimes avoid it because of the smell and 25% often avoid it because of it

This matters because because it shows that many students specifically in King Street avoid it because of the smell or because of it being "unsafe"

On this graph it shows that 80% of students think they should change the current King street Bathrooms.

This matters because there others who also think the bathroom layout at King Street should be changed

This chart is about if you feel comfortable using school bathrooms and 25% said yes while 30% said sometimes and 45% said no

This data matters because it helps understand that a lot of people don't feel safe using the bathrooms at king street because of it being damaged or it not smelling good

### WHAT HAS ALREADY BEEN TRIED?

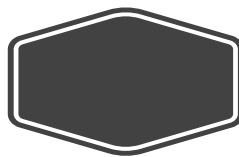

At Mini Howard they have these gender neutral bathrooms which are only toilets and are fully covered with no gaps making it both clean and safe

### WHO CAN HELP?

List stakeholders or groups that could help solve this issue. Explain how each stakeholder or group could help.

You must include 2 stakeholders.

Include their logos too!

### WHAT HAS BEEN DONE SO FAR?

there is nothing that has been made to change this issue just yet

### IS IT ACTUALLY HELPING?

there has been nothing done to change this issue just yet

### WHAT SHOULD CHANGE? (YOUR SOLUTION)

My solution is to either renovate the school bathrooms and make them like the the Mini Howard ones where the bathrooms are fully covered and theirs no gaps in between as well as theirs only toilets and no urinals. My survey better supports this idea because 85% say they should change the King Street while 15% say it should stay the same in addition 45% of students don´t feel safe using King Street Restrooms while 25% say they do feel safe and 30% say they sometimes do. Changing King street bathrooms would make everyone feel safe and bearable to use

### WHAT WILL HAPPEN NEXT?

If my solution is used than more students mostly male would be able to feel and safe and actually use the bathrooms instead of avoiding it because of the smell or feeling unsafe
