TOPIC

School Bathrooms in Alexandria

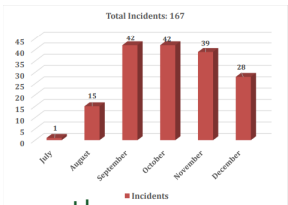

TOPIC DESCRIPTION

My issue in Alexandria is about the school bathrooms, The reason why I’m talking about it is because its not safe or clean for students to use, Lot of students go to bathrooms to get in fights sometimes the student can also get in a fight with a lot of people, Also the bathrooms not being clean it would always smell bad so a lot of students don't use the bathrooms. The person affected are the students because we use the bathroom a lot, it affect us because if the bathrooms are not clean then we can also get sick from being in a dirty bathroom, also fights it affect us because student gets scared to walk in because they don’t know if theirs a person waiting for them to walk in for they can fight.

Over all, It matters for ACHS because if the bathrooms isn't clean or safe what makes the parents that are thinking about putting there kids in a school that isn't clean or safe, the school can also get shut down for not being safe and not fixing anything which can lead it to being shut down.

BASELINE DATA & GOAL

What I know is that the bathrooms are still not being cleaned, The Goal is to have the school clean and safe for students to use.

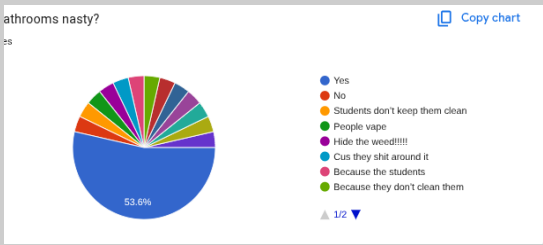

What my Goal is to not have the percentage of rates about Alexandria schools not being safe or clean to go higher because that makes the school look bad.

CYCP GOAL & STRATEGIC AREA

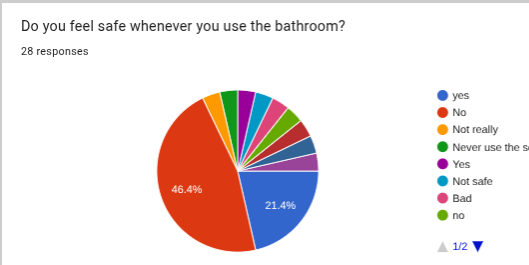

A program that connect to what I'm talking about is the WUSA.9, they also report issues about school bathrooms saftey and cleanliness.

My Goal is to get the principles attention for he can fix the problems that been happening in the bathrooms and also have the bathrooms clean.

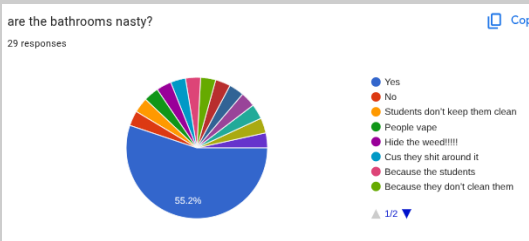

WHAT IS HAPPENING RIGHT NOW?

This Data shows a lot of students agreeing to the bathrooms not being clean or sanitized for students to use and also report it for they can make the bathroom smell good it matters because a lot of students get sick and throw up by the smell

this data shows the students agreeing about the bathrooms not being safe and the students being afraid to enter and also the bathrooms being damaged by the fights that has happens, it matters because some students who use the bathroom can get really hurt by the students who fights.

This data shows how damaged and nasty the bathroom are at school, this data matters because alot of students cant have there privacy because the door cant lock nor theres no door at all, this tells us that the school is not fixing anything, this proves that the principle doesnt care about their bathrooms

WHAT HAS ALREADY BEEN TRIED?

What has been done was that a lot of people reported it and some bathrooms started to not smell bad,The reporters that are basically groups who report about the bathrooms and want them to fix it and it has worked.

WHO CAN HELP?

one of the stakeholder his name is larry he reports anything about highschoools and he recently reported one about the bathrooms not being safe, he let them know that he wants more security on stand by incase anything happens.Another stakeholder is Delia Gonzales shes in a group as larry called Wusa.9 and what she does is also look at schools and also makes sure they are safe and clean for students to use

WHAT HAS BEEN DONE SO FAR?

Quantity:The actions that they provided was to post it and let the internet know about the schools and for they can also talk about it for they can make a change into the bathrooms.

Quality: The actions are working pretty well because schools are kind of starting to feel safe for students to use the bathroom, the only problem is that the smel wont go away or them cleaning it alot.

IS IT ACTUALLY HELPING?

On the data it says that the school bathrooms are a 50/50 about being clean and safe.

Alot of students always use the bathroom because and its also important for them to take a bathroom break after they have done so much work in class.

WHAT SHOULD CHANGE? (YOUR SOLUTION)

In my opinion what i would change is to have security gaurds to check bathrooms every class period that goes on, and i would want to change the smell of the bathroom and add a object that can keep the smell away, also to have a certain amount of students using the restroom for nothing bad can happen or cause.

WHAT WILL HAPPEN NEXT?

If my salution was to be used it would help our school out and parents not worry about there students not being safe and also not getting dirty or diseases from the bathrooms.

Who will benefit and how?

LEARN MORE

The resources i used to find all my data was the Wusa.9 and Also the U.S. Department of education helped me alot to finding things about bathrooms, it gave me alot of details and also showed me graphs of the amount of percentage the school has about the bathrooms not being safe or clean.
